south. The lot was originally platted on September 5, 2000 and is currently void of any structural development. On May 25, 2001, the applicant recorded a vacation of plat instrument with the Register of Deed's Office vacating the lot in order to obtain a building permit. The applicant has indicated that the lot is being revised as identified in order to increase the building area on the property.

STAFF REVIEW: Staff has reviewed the Preliminary and Final Plat and has noted the following considerations:

Construction Plans: Crosswater Drive is located along the west lot line and is currently constructed with curb, gutter and sidewalk along the northern half of the lot. Construction plans including street improvements and water and sewer plans for the entire lot frontage must be submitted for review and approval. The Engineering Division has indicated that the construction plans must be submitted prior to Preliminary Plat approval by the Planning Commission. In addition, the construction plans must be reviewed and approved prior to Preliminary Plat approval by the City Council.

Surety: A subdivision estimate form for the above referenced improvements must be submitted for review and approval. In addition, surety for any required subdivision improvements that have not been completed must be posted and the inspection fees paid prior to City Council approval of the Final Plat.

Staff believes that this proposed plat generally complies with all applicable zoning and subdivision regulations assuming compliance with the stated stipulations.
