REPORT BY	Lisa Seaman

RECOMMENDATION: Staff recommends that the Preliminary and Final Plat be continued to the August 23, 2001 Planning Commission meeting to allow the applicant time to submit the required topographic information.

GENERAL COMMENTS: Currently, a single family residence is located on Lot 11 while Lot 12 is void of any structural development. The applicant wishes to construct a detached garage on the existing Lot 12. The Pennington County Zoning Ordinance requires that accessory buildings, such as a detached garage, be located on the same lot as a principal building within the Suburban Residential Zoning District. In order to comply with this code requirement the applicant has submitted this Preliminary and Final Plat request combining Lots 11 and 12 of Reed Estates into one lot.

STAFF REVIEW: Staff has reviewed this request and noted the following considerations:

Topographic mapping: In addition to the Preliminary and Final Plat request the applicant also submitted a request to waive the requirement for submission of a topographic map of the subject property. The Engineering Division has denied this request because of concerns associated with the drainage easement and ditch located on the property. The Engineering Division has also requested that the topographic map include the location of all utilities and other site improvements.

Fence: The site plan submitted by the applicant indicates that a fence has been constructed within a major drainage easement. Staff has noted that removal of the fence is not necessary at this time. However, the applicant should be aware that future improvements within the drainage easement will require removal and relocation of the fence outside of the major drainage easement at the owner's expense.
