We would like to build an attached 26' x 30' garage onto the existing house adding a laundry room and bathroom where the garage attaches to the house.

The addition would have the same color and style of shingles and siding. It is to be used for parking vehicles in. There will also be a work bench and shelves for storage.

Existing 816 square feet of garage and storage

Proposing an additional 780 square foot garage for a total of 1596 square feet.
