Review

To the Planning department Rapid City, S.D.

In response to the question of a Cellular Phone antenna raised to a height of 100 feet which would be put behind the Canyon Lake Pub + Casino between Jackson Blvd and Lakeview in a chosen space.

I believe it would be in the wrong place near the buildings around it. I believe there are several hills in the area that could give them more coverage or place it on dinosaur hill facing to the west and into various directions. As to close to structures in the area, besides being made of Metal which would take lightning strikes, the trees are enough of a pull for strikes.

I feel they could get more bang for their buck by using the hills in the area for coverage. The area doesn't need the antenna where they want it placed! I feel it would be a bad decision.

Thank you,

Dorothy Amick
