RE: PAL Light Request

The City of Rapid City, Parks Division, is requesting a PAL light installation for Centennial Park, located at the east end of Centennial Street in south Robbinsdale. The park is adjacent to LaCroix Links public golf course and at the cul-de-sac of Centennial Street (800 East Centennial). The desired pole and light location would be approximately 80 feet due south of the existing street light on Centennial Street approximately at the top edge of the drainage swale bisecting the park with underground wiring if possible. A 250 watt floodlight fixture directed to the south lighting the area of the playground would meet our immediate needs. If you would like to meet with me on site just let me know.

After you have had a chance to look at the site to determine installation requirements, please forward a cost estimate. Thank you for your consideration.

Sincerely,

Lon Van Deusen
Parks Division Manager
