---

GENERAL COMMENTS:

This staff report has been updated on November 16, 2004 – all updates to the staff report are shown in bold print. The applicant has submitted a Comprehensive Plan Amendment to the Major Street Plan to relocate the north/south collector street to the east a varying distance of 150 feet to 410 feet through the subject property.

STAFF REVIEW:

The Major Street Plan identifies a north-south collector street to be constructed east of US Highway 16 connecting Catron Boulevard (US Highway 16B) to Sammis Trail. The applicant has submitted a request to relocate the collector street east a varying distance of 150 feet to 410 feet. The South Dakota Department of Transportation has confirmed that the proposed approach onto US Highway 16B (Catron Boulevard) complies with the approved access point onto US Highway 16B. As identified in the US Highway 16 Corridor Study, a north/south collector route is necessary to provide adequate road connectivity for areas east of US Highway 16 and yet help to maintain the integrity of South Dakota Department of Transportation's highway corridor.

The relocation as proposed will create a disconnected collector route through the area. As such, staff is recommending the Comprehensive Plan Amendment be continued to allow the applicant an opportunity to work with the adjacent property owners to the south to ensure a continuous route location for the proposed collector street. Additionally, sewer has been constructed in portions of the dedicated right-of-way to the south of this site, requiring further coordination.

Staff has previously met with various interested parties regarding the relocation of this roadway further to the east as currently requested. Staff has supported that proposal with the requirement that all affected property owners agree with the request and that the new location be coordinated. Based on the proposed discontinuous route, it appears that coordination has not yet occurred.

In summary, staff recommends that the Comprehensive Plan Amendment to the Major Street Plan to relocate the collector street as proposed be continued to allow the applicant an opportunity to work with the property owners to the south to ensure road connectivity between US Highway 16B (Catron Boulevard) and Sammis Trail.

As of this writing, the required sign has been posted on the property and the receipts from the certified mailing have been returned.

This item was continued from the August 5, 2004 and August 26, 2004 Planning Commission meeting to allow the applicant time to work with adjacent property owners on a continuous collector route connecting US Highway 16B to Sammis Trail. During conversation between the applicant and staff, the applicant indicated that discussions with the adjacent property owners have been initiated. The applicant indicated that the road connectivity issues will be resolved by the October 21, 2004 Planning Commission meeting. Staff recommends that the Amendment to the Comprehensive Plan to relocate a Collector Street on the Major Street Plan be continued to the October 21, 2004, Planning Commission

meeting to allow the applicant additional time to work with the adjacent property owner to develop a continuous north/south collector route.

The applicant is bringing forth a revised application to include the property located immediately south of the subject property. As such, staff is recommending that this item be continued to the November 4, 2004, Planning Commission meeting to allow the applicant additional time to submit the necessary information and allow the request to be re-advertised.

The applicant is bringing forth a revised application to include the property located immediately south of the subject property. As such, staff is recommending that this item be continued to the January 6, 2005, Planning Commission meeting to allow the applicant additional time to submit the necessary information and allow the request to be re-advertised. If the information is not submitted at that time, staff will recommend the item be denied without prejudice to allow the application to be resubmitted at a later date.
