Re:

WRF Boiler Repairs

WATER ENVIRONMENT GUARDIANS

Dirk.

The Water Reclamation Facility digester boilers have recently developed significant problems with the burners due to the age of the equipment and corrosive nature of the gas that they burn. These are "Walker Process boilers." Repairs are necessary at this point to keep the boilers operating safely and reliably.

I have obtained quotes for repair of the two digester boilers. Both quotes are for replacement of the burner tube and controls.

The Walker Process Quote is for \$54,442.00 excluding wiring and gas train piping.

The RW Rice quote is for \$23,880, and includes wiring, and gas train work. Recent work that we have done with RW Rice has shown them to be a competent and reliable boiler service and repair company. I therefore recommend accepting the quote from R.W. Rice.

Sincerely

Dave Van Cleave Superintendent

PUBLIC WORKS INFORMAL QUOTES (For items purchased over \$300 and under \$15,000 excluding repair contracts)
