

TRAFFIC CONGESTION AND STUDENT SAFETY AT SOO SAN DRIVE / RANGE ROAD INTERSECTION

Discussion items on traffic issues:

- **Safer way for students to cross Range Road**
- **Reduction in congestion / delays in front of school**
- **Improving school bus circulation for drop off / pick up zone**
- **Improving circulation in intersection of Range Rd and Soo San Dr**

Suggested improvements

1. **Install (temporary) fencing along north side of school property on Range Road**
2. **Install sidewalk from the school bus lane to crosswalk in the southwest corner of the intersection**
3. **Move existing school entrance on Range Road approximately 150 feet west of existing entrance (School and BH Workshop)**
4. **Close the National Forest driveway along Soo San Drive and move entrance onto Range Road (student drop-off & pick-up)**
5. **Relocate Range Road intersection for site distance to the north**
6. **Widen the northwest corner of Soo San Drive and Range Road to accommodate turning movements for the school buses and personal vehicle**
7. **Install No Left Turn signs on Range Road during the school opening and release times**
8. **Install school flasher units on Soo San Drive (with 15 MPH when flashing)**
9. **Close the north church approach and add fencing to the east side of Soo San Drive**
10. **Widen Range Road further to the west as a 3-lane so school bus traffic will not block westbound traffic at the entrance to the back of the school**
11. **Add school entrance on Range Road approximately 150 feet to the west of existing entrance (School & Black Hills Workshop)**
12. **Circulate school buses to back of school from south parking lot**
13. **Employ crossing guard for Range Road pedestrian crossing**
14. **Sign for One-way traffic from Soo San Drive to 38th Street**
15. **Install traffic signal (when warrants permit)**
16. **Install STOP signs**
