Public Works Commissioners:

Re: Proposed Driveway and Curb Replacement.

Due to age and condition the driveway at the above residence in the West Boulevard Historic District needs to be replaced. We propose to replace the existing driveway with no dimensional changes. We do, however, propose to tint and stamp the driveway, not to include the public sidewalk and curb, with a color complimentary to the structure in a Herringbone pattern. Our contractor estimates the cost to install the driveway and curb to be \$3, 116.00.

In keeping with the purpose of the Historic District to preserve the neighborhood's architectural integrity we propose to replace the curb with one which meets the historical standard. Attached you will find photographs of a comparable driveway located at 1702 West Boulevard. Our replacement driveway and curb will resemble that in the photograph exactly except for the color.

Please advise me as to the procedure I must follow to complete this project.

Sincerely,

MICHAEL D. PELLY
