NOTES:

The E Hwy 79 North and South Tributaries as well as the Landfill Tributary drainage boundaries were delineated based on digital 2-foot contour topographic data supplied by the City of Rapid City. Therefore, those boundaries shown in this figure may not exactly match the USGS 7.5-minute Quadrangle topography shown.

The Meade-Hawthorne, South Robbinsdale and South Truck Route Drainages shown were delineated from the USGS 7.5-minute quadrangle topography. The drainage boundaries are shown for representation purposes only. For detailed delineations, please refer to the respective Drainage Basin Design Plans.

The portion of the Robbinsdale Park/Industrial Park Drainage shown in this figure delineates the area of the Meade-Hawthorne Drainage that contributes to the Landfill/South Tributary Drainage.
