Public Works Committee/Common Council

RE: Request Authorization to Seek Proposals for Engineering Services for Project W03-1310 CIP #50471 Willsie Avenue Area Watermain Reconstruction

Staff proposes to reconstruct the existing water mains in Willsie Avenue between Anamosa and North, College Avenue between Willsie and Blaine, Monroe Street between Lemmon and Wood, Wood Avenue between Monroe and North, and loop the watermain in North Street between Willsie and Wood. The existing watermains in this area have had several breaks recently. The looping of the water mains, as well as the addition of some fire hydrants will improve the maintenance ability of the water system in this area.

Staff proposes to hire a Consultant Engineer to be responsible for designing the project, construction inspection and administration, and project closeout.

Funding for this project is the Water Enterprise Fund. The project budget is \$900,000.00, which includes design and construction costs.

Staff proposes to bid and construct the project in 2006.

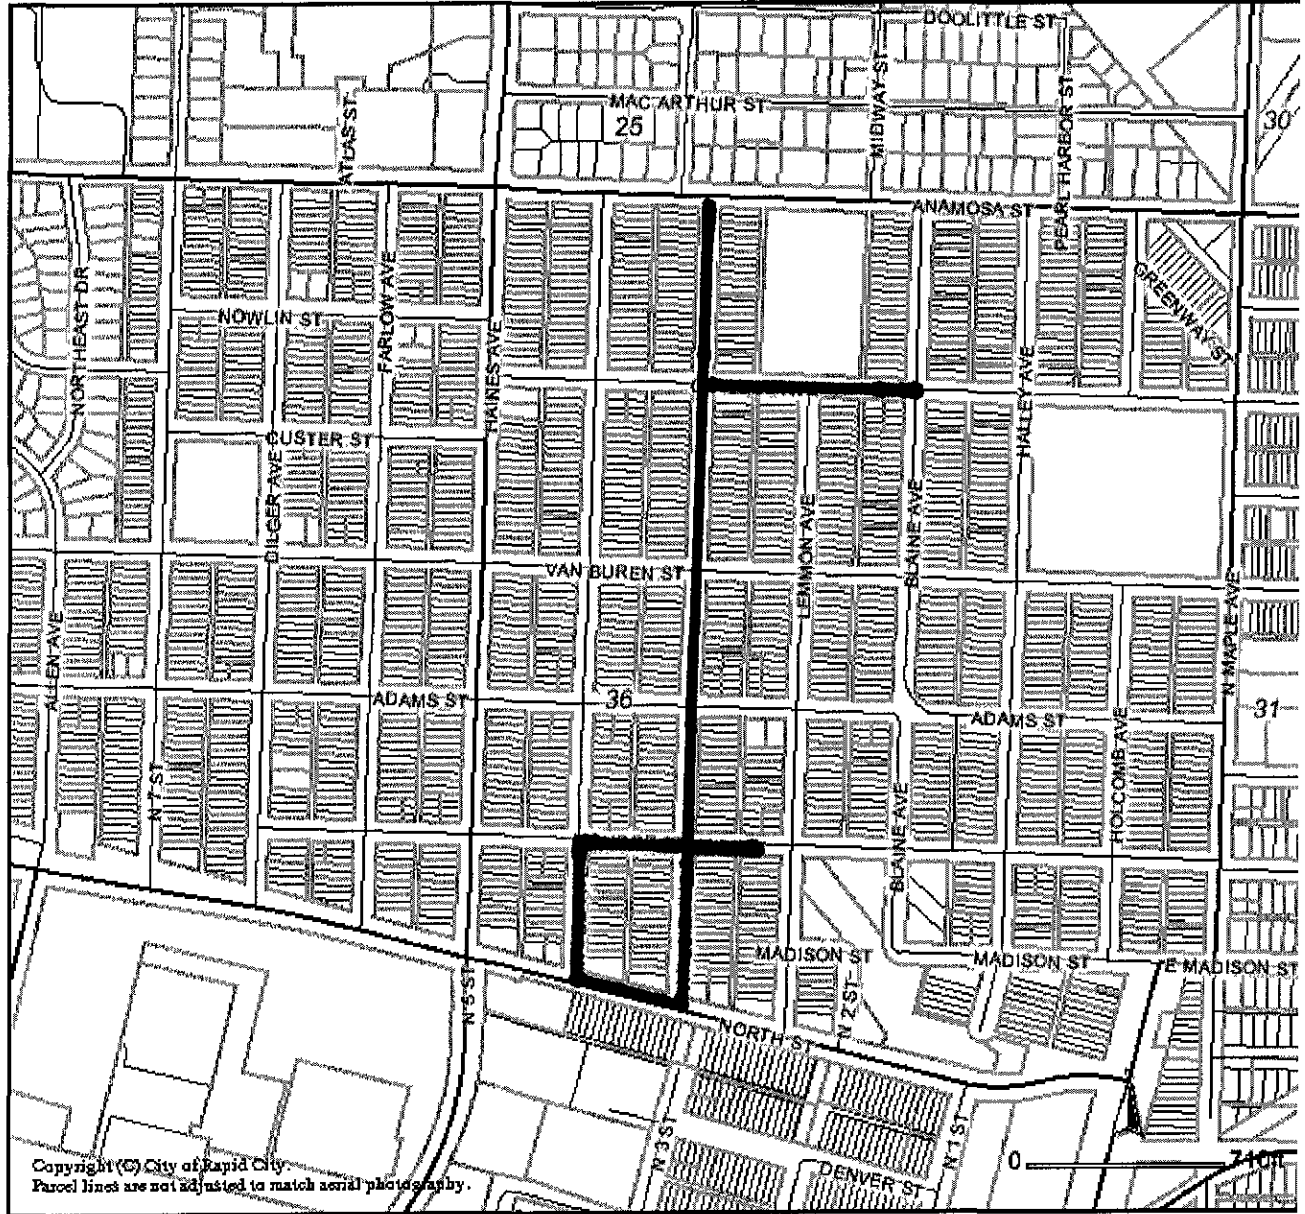

Keith Johnson
Project Administrator

Cc: Dirk Jablonski, Public Works Director
