Date: _____

ACCEPTANCE

FOR AMERICAN ENGINEERING TESTING, INC:

Authorized Signature: 

Typed Name: Roger B. Hodson

Title: Senior Environmental Project Manager

Date: 1/26/07

BLS

PURPOSE AND SCOPE OF WORK TO BE PERFORMED

The purpose of our work on the project will be to assist the City of Rapid City in Compliance with the Administrative Rules of South Dakota and Environmental Protection Agency regulations specified in 40 CFR Parts 257 and 258, "Solid Waste Disposal Facility Criteria," October 9, 1991.

In order to accomplish the above purpose we propose to provide professional services to the City of Rapid City in the form of labor, equipment, supplies, insurance, and other necessary work components necessary to perform the following tasks for Rapid City's Solid Waste Operations Division:

1. Field sampling surface water discharges, wastewater discharges, and groundwater monitoring wells;
2. Laboratory analysis of surface water samples, wastewater samples, groundwater samples, petroleum contaminated soil samples, and yard waste compost samples;
3. Completion and submission of the annual groundwater monitoring report;
4. Limited soils work in calculating permeability and compaction; and
5. Quarterly screening of permanent and existing temporary methane monitoring wells.

Anticipated Work Items

Surface Water:

1. Providing qualified personnel for surface water discharge sampling with a minimum of one-hour notice. This is estimated to occur eight times per year during high precipitation months.
2. Picking up prepared sample bottles, trip blanks, etc. from a state-certified lab and returning all to that lab upon completion of sampling with a properly completed chain-of-custody.
3. Grab samples will be collected weekly during discharge from Outfall 001. Analytes include: TSS, pH, BOD₅, Cd, Cu, Pb, Hg, Zn, As, CrIII, CrVI, Se, Ag, hardness, phenol, toluene, ammonia, DO, and temperature.
4. Sampling for whole effluent toxicity testing if requested or required. *For the purposes of this proposal we have budgeted for two whole effluent toxicity tests per year.*
5. Measuring field pH and temperature at time of sampling. Temperature will be measured

- with a thermistor or a mercury-filled or dial type thermometer. Readings will be recorded to the nearest whole degree Celsius. The date and time will be recorded on field logs and chain-of-custody.
6. pH will be taken within 15 minutes of sample collection with a pH meter. The pH meter will be read to 0.01 SU, be equipped with a temperature compensation adjustment, and be capable of simultaneous calibration to two points on the pH scale bracketing the expected pH.
 7. If a visual sheen is observed during sampling, a grab sample for TPH will be taken. If no sheen is present, a TPH sample is not required. *For the purposes of this proposal we have budgeted for TPH analysis.*
 8. Metals analysis will be performed on a "Total Recoverable" basis and hardness will be measured in the laboratory.
 9. Analytical results will be reported to Solid Waste Operations. Any concentrations exceeding discharge permit limits will be reported directly to the Solid Waste Operations Superintendent as soon as known.
 10. Copies of the field logs, including visual observations and field measurements, will be forwarded to Solid Waste Operation within 72 hours of the sampling event.
 11. A summary of the surface water sampling will be incorporated into the annual report.

Wastewater:

1. Providing qualified personnel for required wastewater testing with a minimum of two hours notice of a discharge. This is estimated to occur 15 times per year. Occurrence may increase with greater precipitation or future operational changes.
2. Picking up prepared sample bottles, trip blanks, etc. from state-certified lab and returning all to lab upon completion of sampling with a properly completed chain-of-custody.
3. Grab samples to be collected once per batch discharge from the aerated leachate pond. Analytes include: total As, Cd, Cr, CrVI, Cu, Pb, Hg, Ni, Se, Ag, Zn, O&G, BOD, TSS, field pH, and temperature. Batch discharges are usually complete within 12 hours of start.
4. Field pH will be taken within 10 minutes after sample collection.
5. Analytical results will be reported in mg/l, except for pH in standard units. Analysis will include the date of analysis, the analyst's initials, and a list of analysis method numbers used, as approved by 40 CFR 136.

6. Notifying the Solid Waste Operations Superintendent immediately if field pH readings are 5.0 SU or less.
7. Notifying the Solid Waste Operations Superintendent, as soon as known, if any concentrations exceed discharge permit limits.
8. Analysis results will be reported to Solid Waste Operations in the units listed in the waste water discharge permit.
9. Copies of the field logs, including visual observations and field measurements, will be forwarded to Solid Waste Operations within 72 hours of the sampling event.
10. A summary of the waste water sampling will be incorporated into the annual report

Groundwater:

1. Providing qualified personnel for semi-annual groundwater monitoring. Nine to 10 wells will be sampled during the April event and 11 to 12 wells will be sampled during the October event.
2. Picking up prepared sample bottles, trip blanks, etc. from state-certified lab and returning all to lab upon completion of sampling with a properly completed chain-of-custody.
3. Utilizing all appropriate QA/QC practices for field sampling of groundwater.
4. Measuring and recording groundwater elevations during both semi-annual sampling events for all site monitoring wells..
5. Collecting samples from each well using a peristaltic pump.
6. Sampling wells **1-8-19 dab2** (if insufficient water sample dab1), **1-8-19da2**, **1-8-19dd**, **1-8-19ddd2** (if insufficient water sample ddd1), **1-8-19dc**, **1-8-19cdd2** (both cdd1 and cdd2 are historically dry), and **1-8-19cab1** *semiannually* for 40 CFR Appendix I volatile organic compounds (VOCs) and the alternative list to metals - biochemical oxygen demand (BOD), chemical oxygen demand (COD), total organic carbon (TOC), chloride, ammonia, sulfate, sulfide, dissolved iron and manganese, methane, nitrate, and major cations (calcium, sodium, potassium). Monitoring wells **1-8-19ad2**, **1-8-19ad1**, and **1-8-19da1** will be sampled and analyzed *semiannually* for the alternative list to metals and *annually* 40 CFR Appendix I VOCs and the alternative list to metals. Monitoring well **1-8-19ca2** will be sampled and analyzed *annually* for 40 CFR Appendix I VOCs and the alternative list to metals. Field measurements for temperature, pH, conductivity, dissolved oxygen (DO), and oxidation-reduction potential will be performed at each well during

sampling using a low flow purging method via a flow-through cell. All groundwater monitoring will be done in accordance with the approved groundwater monitoring program (GWMP) for the Rapid City Landfill, as approved by the South Dakota Department of Environment and Natural Resources (SD DENR).

7. Forwarding analytical results and field measurements for the semiannual monitoring events to Solid Waste Operations upon completion.
8. Notifying the Solid Waste Operations Superintendent, as soon as known, if any concentrations exceed regulatory limits.
9. Compiling and completing a statistical analysis of the new data and entering the data into the annual groundwater report. The statistical analysis procedure will comply with 40 CFR Part 258.53, Sections e through i.
10. Completing an annual report summarizing the groundwater monitoring data for each year with appropriate statistical comparison to prior data. An initial report will be completed and submitted to Solid Waste Operations no later than February of the following year and two final copies (one to Solid Waste Operations and one to SD DENR) by April 1 of the following year. This report will discuss the applicable items in 40 CER Part 258.53, Sections a through i.
11. Forwarding copies of field logs, including visual observations, field measurements, and analytical results to Solid Waste Operations.
12. Electronic files related to the groundwater monitoring statistical analysis and annual report will be maintained and provided to Solid Waste Operations upon request.

Quarterly Methane Monitoring:

1. Providing qualified personnel and equipment for quarterly field screening for methane from permanent and existing temporary methane monitoring wells.
2. Submitting a summary of the results of the above activities within the annual report.
3. Advising the Solid Waste Operations Superintendent of any significant issues related to methane.

Petroleum Contaminated Soils:

1. Analyzing soil samples for total petroleum hydrocarbons. Samples may contain gasoline, diesel, JP4 or JP8. There are estimated to be 24 samples per year for analysis.
2. Forwarding results to Solid Waste Operations.

3. Faxing results, upon request, to Solid Waste Operations within 15 calendar days of sample receipt.

Yard Waste Compost Samples:

1. Analyzing yard waste compost samples for carbon to nitrogen ratio. There are estimated to be 60 samples per year for analysis.
2. Faxing preliminary results to Solid Waste Operations within 15 calendar days of sample receipt.
3. Forwarding all final results to Solid Waste Operations.

Soils Testing:

1. Providing qualified personnel and equipment to perform permeability, proctor, gradation and atterberg limits testing, as requested.
2. Reporting results of the above tests within five working days of the test completion.

2007 SAMPLING, ANALYSIS AND REPORTING FOR RAPID CITY LANDFILL (analysis by Energy labs & Test America)

SECTION 1 - RESPONSIBILITIES

1.1 - The party to whom the proposal/contract is addressed is considered the Client of American Engineering Testing, Inc (AET). The terms and conditions stated are binding, upon acceptance, on the Client, its successors, assignees, joint ventures and third-party beneficiaries. **Oral proposal acceptance or authorizing purchase orders from the Client are considered formal acceptance of AET's terms and conditions.**

1.2 - Prior to AET performing work, Client will provide AET with all information that may affect the cost, progress, safety and performance of the work. This includes, but is not limited to, information on proposed and existing construction, all pertinent sections of contracts between Client and property owner, site safety plans or other documents which may control or affect AET's work. If new information becomes available during AET's work, Client will provide such information to AET in a timely manner. Failure of client to timely notify AET of changes to the project including, but not limited to, location, elevation, loading, or configuration of the structure or improvement will constitute a release of any liability of AET. Client will provide a representative for timely answers to project-related questions by AET.

1.3 - Work by AET will not relieve other persons of their responsibility to perform work according to the contract documents or specifications, and AET will not be held responsible for work or omissions by Client and other persons. AET does not perform construction management, general contracting or surveying services and our presence on site does not constitute any assumption of those responsibilities. AET will not be responsible for directing or supervising the work of others, unless specifically authorized and agreed to in writing.

1.4 - Work by AET often includes sampling at specific locations. Inherent with such sampling is variation of conditions between sampling locations. Client recognizes this uncertainty and the associated risk, and acknowledges that opinions developed by AET, based on the samples, are qualified to that extent.

1.5 - AET is not responsible for interpretations or modifications of AET's recommendations by other persons.

1.6 - Should changed conditions be alleged, Client agrees to notify AET before evidence of alleged change is no longer accessible for evaluation.

SECTION 2 - SITE ACCESS AND RESTORATION

2.1 - Client will furnish AET safe and legal site access.

2.2 - It is understood by Client that in the normal course of the work, some damage to the site or materials may occur. AET will take reasonable precautions to minimize such damage. Restoration of the site is the responsibility of the Client.

SECTION 3 - SAFETY

3.1 - Client shall inform AET of any known or suspected hazardous materials or unsafe conditions at the work site. If, during the course of AET's work, such materials or conditions are discovered, AET reserves the right to take measures to protect AET personnel and equipment or to immediately terminate services. Client shall be responsible for payment of such additional protection costs.

3.2 - AET shall only be responsible for safety of AET employees at the work site. The Client or other persons shall be responsible for the safety of all other persons at the site.

SECTION 4 - SAMPLES

4.1 - Client is responsible for informing AET of any known or suspected hazardous materials prior to submittal to AET. All samples obtained by, or submitted to, AET remain the property of the Client during and after the work. Any known or suspected hazardous material samples will be returned to the Client at AET's discretion.

4.2 - Non-hazardous samples will be held for 30 days and then discarded unless, within 30 days' of the report date, the Client provides a written request that AET store or ship the samples, at the Client's expense.

SECTION 5 - PROJECT RECORDS

The original project records prepared by AET will remain the property of AET. AET shall retain these original records for a period of three years following submission of the report, during which period the project records can be made available to Client at AET's office at reasonable times.

SECTION 6 - STANDARD OF CARE

AET will perform services consistent with the level of care and skill normally performed by other firms in the profession at the time of this service and in this geographic area, under similar budgetary constraints. No other warranty is implied or intended.

SECTION 7 - INSURANCE

AET carries Worker's Compensation, Comprehensive General Liability, Automobile Liability and Professional Liability insurance. AET will furnish certificates of insurance to Client upon request.

SECTION 8 - DELAYS

If AET work delays are caused by Client, work of others, strikes, natural causes, weather, or other items beyond AET's control, a reasonable time extension for performance of work shall be granted, and AET shall receive an equitable fee adjustment.

SECTION 9 - PAYMENT, INTEREST AND BREACH

9.1 - Invoices are due on receipt. Client will inform AET of invoice questions or disagreements within 15 days of invoice date; unless so informed, invoices are deemed correct.

9.2 - Client agrees to pay interest on unpaid invoice balances at a rate of 18% per month, or the maximum allowed by law, whichever is less, beginning 30 days after invoice date.

9.3 - If any invoice remains unpaid for 60 days, such non-payment shall be a material breach of this agreement. As a result of such material breach, AET may, at its sole option, terminate all duties to the Client or other persons, without liability.

9.4 - Client will pay all AET collection expenses and attorney fees relating to past due fees which the Client owes under this agreement.

SECTION 10 - MEDIATION

10.1 - Client and AET agree that any claim, dispute or other matter in question arising out of or related to this Agreement shall be subject to mediation as a condition precedent to arbitration or the institution of legal or equitable proceedings by either party.

10.2 - Unless Client and AET mutually agree otherwise, mediation shall be in accordance with the Construction Industry Mediation Rules of the American Arbitration Association. Request for mediation shall be in writing and the parties shall share the mediator's fee and any filing fees equitably. The mediator shall be acceptable to both parties and shall have experience in commercial construction matters.

SECTION 11 - LITIGATION REIMBURSEMENT

Payment of AET costs for Client lawsuits against AET which are dismissed or are judged substantially in AET's favor will be the Client's responsibility. Applicable costs include, but are not limited to, attorney and expert witness fees, court costs, and AET costs.

SECTION 12 - MUTUAL INDEMNIFICATION

12.1 - AET agrees to hold harmless and indemnify Client from and against liability arising out of AET's negligent performance of the work, subject to Section 13 and any other limitations, other indemnifications or other provisions Client and AET have agreed to in writing.

12.2 - Client agrees to hold harmless and indemnify AET from and against liability arising out of Client's negligent conduct, subject to any limitations, other indemnifications or other provisions Client and AET have agreed to in writing.

12.3 - If Client has indemnity agreement with other persons, the Client shall include AET as a beneficiary.

SECTION 13 - LIMITATION OF LIABILITY

Client agrees to limit AET's liability to Client arising from negligent acts, errors or omissions, such that the total liability of AET shall not exceed \$100,000 or shall not exceed the project fee, whichever is greater.

the limits of any insurance coverage

SECTION 14 - TERMINATION

After 7 days written notice, either party may elect to terminate work for justifiable reasons. In this event, the Client shall pay for all work performed, including demobilization and reporting costs to complete the file.

SECTION 15 - SEVERABILITY

Any provisions of this agreement later held to violate a law or regulation shall be deemed void, and all remaining provisions shall continue in force. However, Client and AET will in good faith attempt to replace an invalid or unenforceable provision with one that is valid and enforceable, and which comes as close as possible to expressing the intent of the original provision.

SECTION 16 - GOVERNING LAW

This Agreement shall be construed, and the rights of the parties shall be determined, in accordance with the Laws of the State of ~~Minnesota~~ South Dakota, 7th Judicial Circuit, Rapid City, Penn. Co.

SECTION 17 - ENTIRE AGREEMENT

This agreement, including attached appendices, is the entire agreement between AET and Client. This agreement nullifies any previous written or oral agreements, including purchase/work orders. Any modifications to this agreement must be in writing.
