Mr. Dirk Jablonski
Director of Public Works
City of Rapid City
300 6th St.
Rapid City, SD 57701

Dear Mr. Jablonski,

It is my understanding that Corner Construction is currently on non-responsible bidder's status regarding City of Rapid City projects.

This stems from our request that our low bid for the Red Rocks Water Reservoir be removed from consideration due to a clerical error we made when completing our proposal (copy enclosed).

We again apologize for our error and any problems caused because of it. It is not typical of our company to make errors when submitting proposals. We underestimated the amount of effort required to compare costs of the two types of reservoir construction (pre-stressed and post-tensioned) in the time available once the proposals were received from the respective subcontractors, resulting in an omission of one page of our compilation.

We respectfully request that Corner Construction be reinstated as a responsible bidder in order to allow us to bid and construct City of Rapid City projects in the future.

I'm happy to meet with you at your convenience to discuss this and respond to any concerns or questions you may have.

Sincerely,
CORNER CONSTRUCTION CORPORATION

Robert F. Corner, President
