Elk Vale Road Sanitary Trunk Sewer Extension
Project No. SS07-1658 / CIP No. 50658

The Rapid City Council has appropriated \$500,000.00 from the .16 Fund for design and construction of a sanitary sewer in the Elk Vale Road Area. The project will begin on the south side of Highway 44 and extend north along Elk Vale Road to Homestead Street.

The City has identified a need for a sanitary sewer capacity upgrade to accommodate existing and proposed sewer flows. This project will consist of the design and construction of an 18" sanitary sewer line to compliment the existing 12" line.

A consultant will be selected for this project in accordance with the City of Rapid City's current Consultant Selection Policy. The selected consultant will be contracted for the design phase services. Upon successful completion of the design phase it is anticipated we may contract with the consultant for construction observation as well.

Staff proposes to design and bid the project in 2007 with construction to be completed by May 1, 2008.

The operation and maintenance costs after completion of this project will be minimal. The project will result in a new sanitary trunk sewer main with an anticipated useful life of approximately 75 years.
