City Council  
 300 6<sup>th</sup> St  
 Rapid City, SD 57701

Dear City Council Members:

This petition is presented to you in regard to a proposed rezoning of property located at 2935 Sheridan Lake Road. The file numbers are 07RZ076 and 07CA061. It was brought to our attention that the current owners along with their agent are requesting rezoning from low density residential to neighborhood commercial. As property owners whose land currently borders this property, we are opposed to this change in zoning.

We would like to keep our neighborhood as it is and not open it up further to commercial properties. There is property currently available and already zoned for commercial use across the street from the property that is requesting the change.

Development of this property for commercial use would adversely effect all properties bordering it. No one wants a busy store or group of stores in their backyards. This would literally be the case if the zoning change is accepted. It will also decrease the value of our homes along with some of the reasons why we currently enjoy our properties.

We agree with the planning commission's reasons for denying this request. Thank you for considering our opinions on this matter.

Sincerely,

Property Owners Bordering 2935 Sheridan Lake Road
