**RE: Case #07PD099, appeal to City Council**

To Whom It May Concern:

I would like to appeal Case #07PD099 to the City Council for the following reasons:

- 1) The area is within the floodplain/floodway and appears to be below the 100 year flood levels.
- 2) The whole area appears to be subject to inundation with a 100 year flood.
- 3) The bridge will tend to act as a dam when debris is washed against it and then the area behind will be inundated.
- 4) The appropriate approach is usually to put the parking lots in the area that could possibly be inundated. In this case the buildings are adjacent to the creek and the parking areas away from the possible inundation areas.
- 5) This whole project seems to be in an area that is subject to inundation with a 100 year storm.

Since I am on the Flood Review Committee, I have asked that this project be discussed at the next meeting on February 1, 2008.

Sincerely,

Fred Weishaupl
