ITEM 57

16B Sewer Tax Increment District Project Plan be approved. Staff further recommends that the funds identified as Contingency be split equally between Contingency and Necessary and Convenient costs.

GENERAL COMMENTS: This staff report has been revised as of July 16, 2008. All revised and/or added text is shown in bold print. This application was continued to the July 24, 2008 Planning Commission meeting at the applicant's request. The applicant has requested the creation of a Tax Increment District to assist in the development of Hyland Crossing Subdivision. The Tax Increment funds are to be utilized for sanitary sewer main, abandoning two lift stations, sewer force main, turn lanes, traffic signal, new lift station, engineering and contingency costs. The applicant will fund the project costs of the Tax Increment District.

During the construction phase of the project and until the project is cash flowing from a tax revenue basis, the developer and lender shall be free to negotiate an interest rate not to exceed nine (9) percent. Within 90 days of the date the developer is notified by the City that the tax revenue is sufficient to amortize the debt over the remaining life of the Tax Increment Financing District, as confirmed by the Financial Institution, the interest rate on the remaining balance shall be reset at an interest rate of not more than three (3) percent over the published ten (10) year U.S. Treasury rate not to exceed nine (9) percent. The estimated cost of the improvements will be financed by the Developer. A 9% interest rate was used for the project plan. The project costs will total \$3,624,000. The Project Plan is estimated to be paid in 15 years.

It is anticipated that one or more of the properties in this proposed Tax Increment District will be used for commercial purposes. Within the proposed District, 37% of the properties are zoned General Commercial District. As such, the creation of this Tax Increment District for economic development purposes will not require an additional levy to make up for the School District's share of the property taxes included in the Tax Increment. The public improvements will enhance the ability for new development to occur and increase the community's economic vitality and expand the City's property tax base.

The proposed District boundaries incorporate approximately 744.08 acres located along Catron Boulevard from Fifth Street to South U.S. Highway 16, then south along U.S. Highway 16 to Sammis Trail and east to Hyland Crossing Subdivision.

STAFF REVIEW: The Tax Increment Financing Review Committee reviewed this proposal on June 25, 2008 and recommended approval of the creation of the Highway 16B Sewer Tax Increment District.

The applicant has indicated that the proposed project complies with all applicable statutory requirements as well as the City's adopted Tax Increment Policy. In addition to the mandatory criteria, the applicant indicated that the proposal met the following two optional criteria:

Criteria #1: The project must demonstrate that it is not economically feasible without the use of Tax Increment Financing. In addition, if the project has site alternatives, the proposal must demonstrate that it would not occur in Rapid

ITEM 57

City without Tax Increment Financing.
Criteria #2: The project will eliminate actual or potential hazard to the public. Hazards may include condemned or unsafe buildings, sites, or structures.

Additionally, the following discretionary criteria are met:

Criteria #2: All TIF proceeds are used for the construction of public improvements.

Criteria #9: The project costs are limited to those specific costs associated with a site that exceed the typical or average construction costs (i.e. excessive fill, relocation costs, additional foundation requirements associated with unusual soil conditions, extension of sewer or water mains, on-site or off-site vehicular circulation improvements, etc.).

Copies of the adopted Tax Increment Financing Policy are attached for your reference.

At the May 29, 2008 Tax Increment Financing Policy Committee meeting, the Committee recommended that the percentage of proposed Contingency and Necessary and Convenient costs be specifically identified in the review of the proposed district. If the total amount exceeded 10%, a written justification would be included in the application. Although this has not been adopted by the City Council at this time, the total proposed Contingency costs for this Tax Increment District is 10%. There are no Necessary and Convenient costs identified in this Plan as recommended by the Tax Increment Financing Project Review Committee. Staff strongly encourages the inclusion of a Necessary and Convenient line item in the Project Plan to provide flexibility to shift dollars should unexpected costs be identified during the construction of the project. Staff would recommend that the dollar amount included for Contingency be split equally between Contingency and Necessary and Convenient Costs.

This item was continued to the July 24, 2008 Planning Commission meeting at the applicant's request. The Tax Increment Financing Project Review Committee recommends approval of the attached resolution approving the Project Plan for Highway 16B Sewer Tax Increment District.
