Robert Ellis
Director, Public Works Department
City of Rapid City
300 6th Street
Rapid City, South Dakota 57701

Dear Robert,

High ground water this year is causing problems for us at in the basement of the old South Town Mall. This building is located between Floreman and St. Anne Streets behind the Safeway store on Mount Rushmore Rd. There are no City storm sewers in this area so we are pumping the water up onto our parking lot. The water exits our lot onto both Floreman and St. Anne streets. While this solution is working now, we foresee problems this winter when the temperatures drop below 25 degrees. The sheets of ice will cause safety problems both on our parking lot and on the City streets. Would it be possible to amend the City ordinances to allow us to discharge the ground water into the sanitary sewer system during the winter months? We would be willing to pay an additional sewer fee for the extra water that we would be putting into the system.

Thank you for your help in this matter.

Sincerely,

Bob Brandt
