No. 08PL135 - Preliminary Plat

ITEM 26

The applicant has submitted a Preliminary Plat application to subdivide a 1.97 acre lot into two lots. The property is located south of the intersection of Finch Court and Sheridan Lake Road on the west side of Sheridan Lake Road. Currently, a single family residence is located on the property.

STAFF REVIEW:

Staff has reviewed the Preliminary Plat application and has noted the following considerations:

Sheridan Lake Road: Staff has noted that sidewalk, curb, gutter, and street light conduit are currently in place along Sheridan Lake Road. Sheridan Lake Road is classified as a principal arterial street. The Street Design Criteria Manual requires 100 feet of right-of-way and twelve feet of pavement width per lane. Staff noted that the applicant must demonstrate that there is adequate right-of-way and pavement along Sheridan Lake Road where it abuts the property. Staff recommends that prior to Planning Commission approval of a Preliminary Plat application the applicant must identify adequate right-of-way and pavement width as per the Street Design Criteria Manual for a principal arterial street along Sheridan Lake Road or obtain a Variance to the Subdivision Regulations.

Access: A driveway currently exists along the north lot line of proposed Lot B to serve the existing residence on proposed Lot A. However, a site plan has not been submitted for review and approval showing the location of the proposed driveway to Lot B. Staff is recommending that prior to Planning Commission approval of a Preliminary Plat application the applicant must submit a complete site plan showing the existing and proposed driveways and a revised plat document showing a shared approach on Sheridan Lake Road for review and approval.

Drainage, Grading and Erosion Control Plans: Drainage information has been submitted for review and approval. In addition, the applicant has submitted a site plan showing a proposed drainage and utility easement along the common line of the proposed lots. However, the Preliminary Plat document does not show the proposed easement. Staff is recommending that prior to Preliminary Plat approval by the City Council, a revised plat be submitted for review and approval demonstrating the proposed drainage and utility easement.

Lot Configuration: The Subdivision Regulations states that "...for lots in residential districts having a width of not more than one hundred fifty feet, the lot length shall not be greater than twice the lot width". The proposed Preliminary Plat identifies that proposed Lot A will have a length twice the distance of the width, as such an Exception must be obtained to allow the lot configuration or the plat document must be revised accordingly. Please note that the applicant has requested the Exception and staff is in the process of reviewing the Exception as requested.

Water and Sewer Service: The applicant has submitted a site plan stamped by a Registered Professional Engineer showing water and sewer service lines extending from Sheridan Lake Road across proposed Lot B to serve proposed Lot A. The site plan also demonstrates abandoning the existing on-site waste water system. However, the applicant has not demonstrated sufficient quantities for domestic and fire flows for review and approval. As

ITEM 26

such, staff recommends that prior to Planning Commission approval of the Preliminary Plat application the required information shall be submitted for review and approval. In addition, an Exception is required to allow service lines to cross adjacent properties. Staff recommends that prior to Planning Commission approval of the Preliminary Plat application an Exception shall be obtained to allow services lines on the adjacent property or a revised utility plan must be submitted for review and approval relocating the proposed utility service lines.

Inspection Fees and Surety: Chapter 16.20.080 of the Rapid City Municipal Code states that before any Final Plat is approved, an additional fee shall be paid to the City to cover the costs of inspection of the subdivision improvements required by the Ordinance. In addition, surety for any required subdivision improvements that have not been completed must be posted. As such, staff is recommending that upon submittal of a Final Plat application, surety be posted and subdivision inspection fees be paid as required.

Warranty Surety: On June 19, 2006, the City Council adopted a resolution establishing a formal warranty process for subdivision improvements. In particular, the resolution requires that the developer provide an acceptable Warranty Surety for the required public improvements. In addition, the Warranty Surety must be in force for a period of two years after the required final inspection and the City has accepted the improvements. As such, staff is recommending that prior to the City's acceptance of the public improvements, a warranty surety be submitted for review and approval as required.

Staff is recommending that the Preliminary Plat be continued to the **November 20, 2008** Planning Commission meeting to allow the applicant to submit the required information as outlined above.
