

A group of approximately ten Canada geese are gathered in shallow water near a rocky shore. The geese have brown and white feathers with black heads and necks. The water is dark and reflects the geese. The background is a dark, overcast sky.

CANYON LAKE PARK

Report

December 2, 2009

Built for it's Beauty

Canyon Lake is Home To:

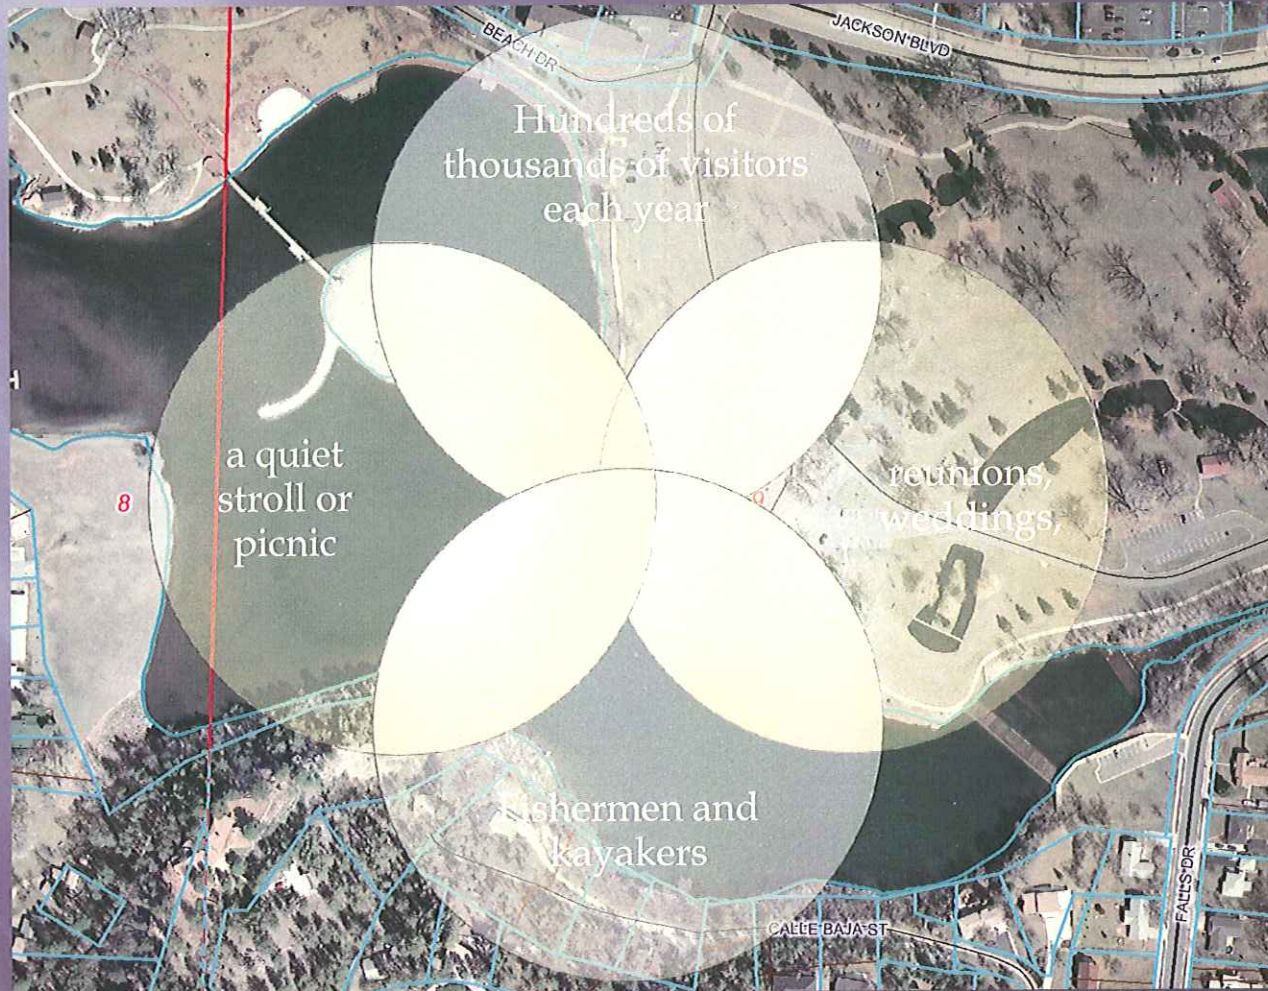

- ▣ 46 acres of land
- ▣ 27 acre lake
- ▣ Over 2 miles of sidewalks
- ▣ 5 Picnic Shelters
- ▣ 4 Public Restrooms
- ▣ Boat Ramp
- ▣ 294 Parking spaces
- ▣ 130' Bridge
- ▣ 5 fishing docks

Million Dollar Views

Crown Jewel

It is also a place where wildlife
and people come together

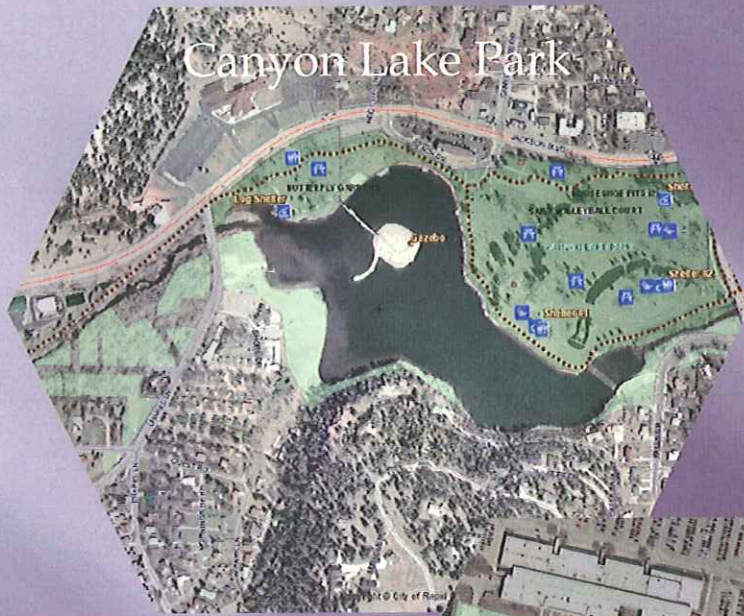

And these encounters sometimes lead to unhappy people on what should be happy occasions.

- ▣ Geese can leave up to five-pounds of waste daily

Three Parks to Consider

Canyon Lake Park

Over 2 Miles of Walkways

46 Acres of Grass Areas

Memorial Park

3.75 Acre Lake

Just under 2 mile of Sidewalk

40 Acres of Grass Areas

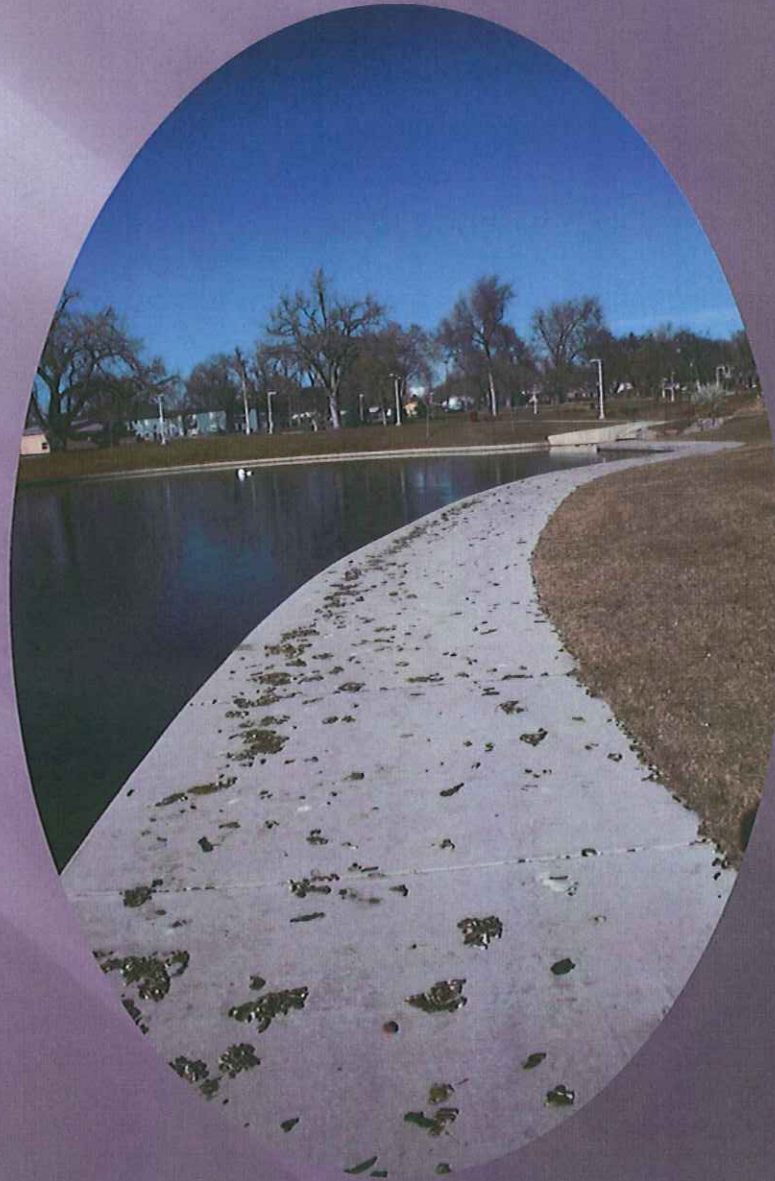

Roosevelt Park

30 Acres
of Land

1.50 Acres
of Water

1.25 Mile of Sidewalk

Cleaning Options

Manpower For Sidewalks Only

- ▣ NRPA Standards = 1 man hr. per 2,000 sq ft
- ▣ 104 Man Hrs to Hand Sweep all Three Parks
- ▣ \$2,495.00 per occurrence
- ▣ \$129,730 per year or 3 FTEs

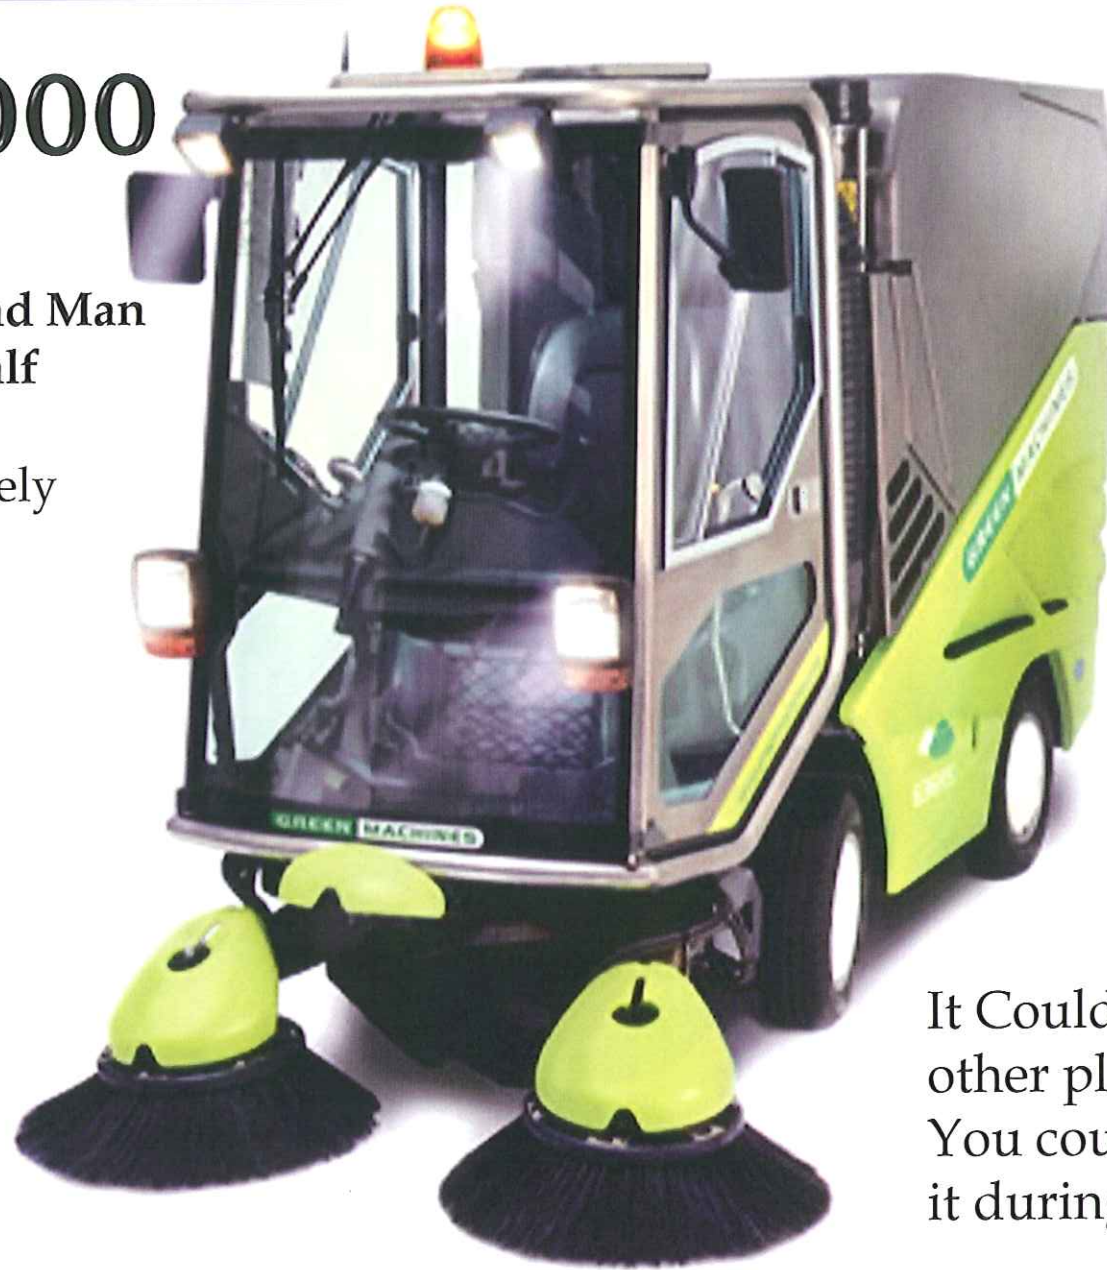

- ▣ DOC
- ▣ Approximately \$71,656.00 per year
- ▣ 1 Supervisor @ \$25.00 hr - 3 Inmates - \$3.15 hr

\$75,000

**Cut Time and Man
Power in Half**

Approximately
1.25 FTEs

\$75,000

It Could be used in
other places.
You could not use
it during cold.

Power Washer Attachment

\$6,000

Inexpensive

Can't be used during cold.

Turf Areas

Turf Sweeper Pull Behind

\$17,000

Turf Sweeper All in One

\$40,000

Brush Attachments

Turf Sweeping Man Hours

Unknown

Estimated at 16 hours
per week at Canyon

Lake Park

About \$20,000 per year

Goose Repellent

\$250 per application

LIQUID FENCE[®]
PRO
DIVISION

Features and Benefits

- Guaranteed effectiveness
- Works year round
- Easy-to-use
- Won't harm animals when used as directed

Mix / Spread Rate

- Ratio 8:1
- 8 ppt @ 1/2 gallon of solution
- 16 oz. per gallon of water

Coverage Rate

Blanket Coverage:
One gallon of concentrate covers approximately 16,000 sq. ft.

Perimeter Band:
One gallon of concentrate will provide approximately 640 linear feet x 25 feet of banding spray

Frequency Rate

Reapply every 2 to 3 weeks as needed or as treated turf is mown

Active Ingredient (Concentrate %)

Methyl anthranilate (Benzoic acid, 2-amino-, methyl ester) 20.72%

TECHNICAL DATA SHEET

Goose Repellent

Designed to repel geese, turkeys and ducks from any turf areas where these birds are a problem. Ideal for all public places, from parks to golf courses - Liquid Fence[®] Goose Repellent will dramatically reduce goose, turkey and duck habitation and the unsightly, unhealthy bird droppings they leave behind.

Geese: Public nuisance number one

With a Canadian Goose population of an estimated 6 million, and the possibility of that number doubling every five years - business owners and private and public facility managers need all the help they can get to rid their property of these ever-present birds. Damaging grass and other vegetation, polluting ponds and spreading disease, geese can actually endanger humans with aggressive, nasty behavior.

How Liquid Fence Goose Repellent works

The application of Goose Repellent makes the food supply in the treated area very undesirable to geese, turkeys and ducks. The elimination of the food source will completely change the feeding habits of these birds and cause them to look for a more desirable feeding location.

Liquid Fence Goose Repellent can be applied in two different coverage applications. Blanket coverage (left), for a complete, overall repellency and as a perimeter band (right) for more selective coverage.

Directions for use

For best results, agitate well. Add 16 ounces of Liquid Fence Goose Repellent Concentrate per gallon of water. Product can be applied in two ways:

1. Blanket-spray entire turf area with a solution rate of 20 gallons per acre.
2. Apply as a perimeter band approximately 30 feet wide around the perimeter of water ways. Do not apply directly to water ways.

Agitate solution frequently. Rinse equipment thoroughly after use.

Cleaning

Reapply when it
rains or sprinklers
are used.

Signs

PLEASE DO NOT FEED GEESE OR DUCKS

Feeding waterfowl causes the following problems:

- birds' dependence on people for food
- conflicts between birds and people
- pollution to water systems and surrounding environment
- spread of diseases that can kill large numbers of birds

Thank you for helping us protect these waterfowl!
