Re: Request Authorization to Seek Proposals for Engineering Services for the Jackson Boulevard & West Main Street Intersection Reconstruction. ST11-1945 / CIP #50858

This project will reconstruct the intersection of West Main Street and Jackson Boulevard. The project will include replacing water and sewer mains throughout the intersection, storm sewer improvements and traffic signal replacement.

The project is needed due to the poor condition of the pavement in the intersection, which frequently requires the street department to enter this busy intersection to fill in the concrete joints with asphalt.

Staff proposes to hire a Consultant to design the intersection and associated utilities for bid letting either in the fall of 2012 or spring of 2013. The construction is anticipated to begin after completion of the SDDOT Jackson Boulevard Project.

The project is funded from the Water Enterprise, Sewer Enterprise, CIP Streets, CIP Drainage. The project is estimated to cost \$1,150,000 which includes design and construction costs.

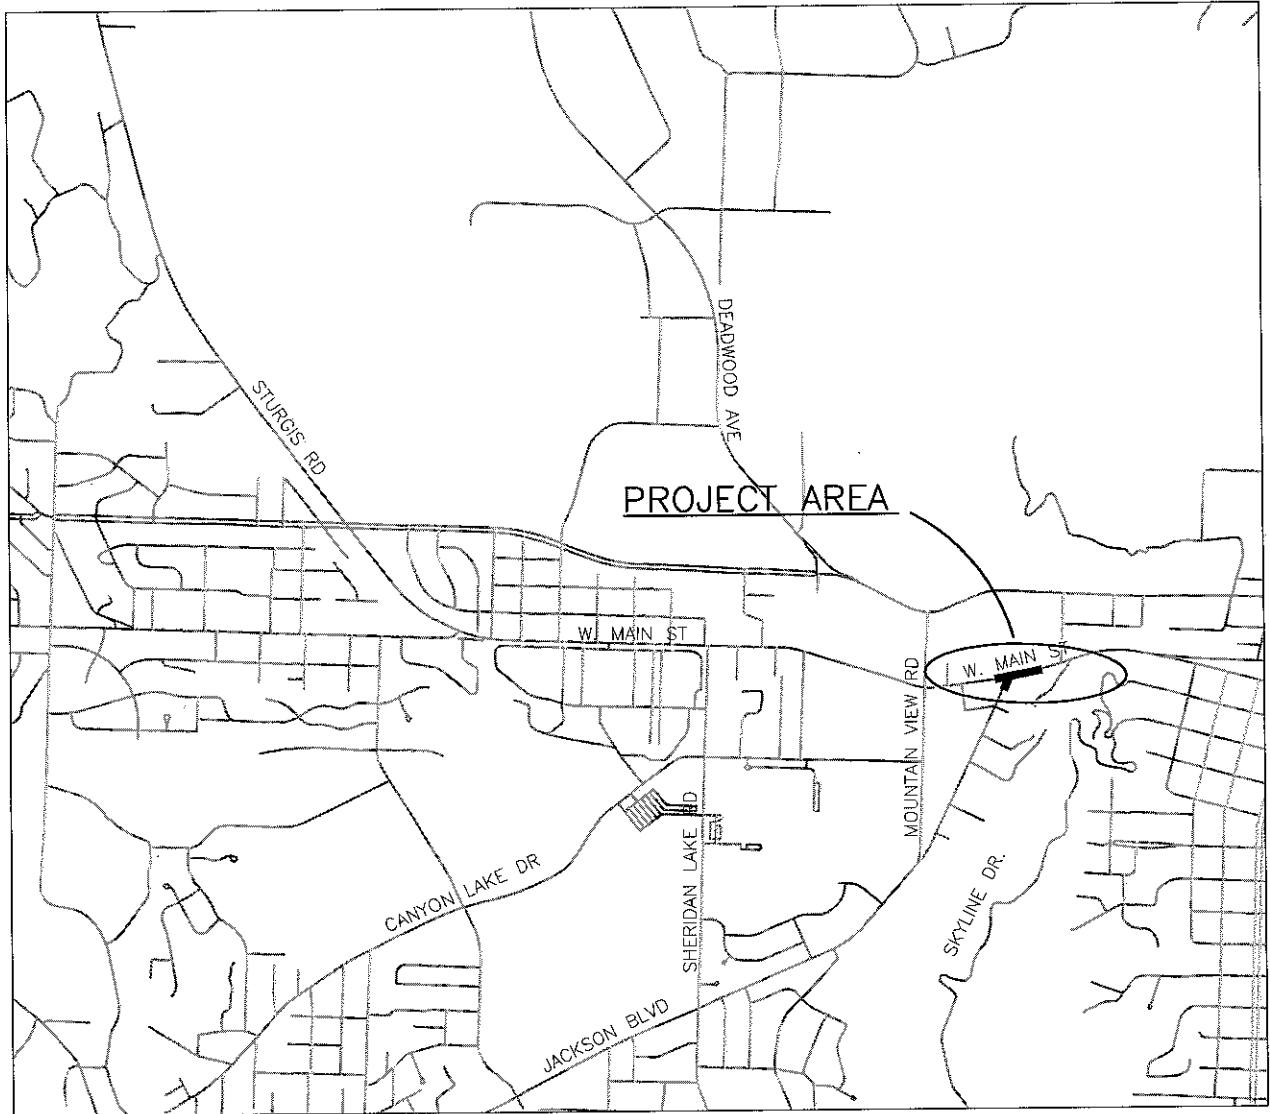

Dale Tech, PE/LS
City Engineer
