Re: Request Authorization to Seek Proposals for Engineering Services for Leland Lane and Rushmore Street Reconstruction Project SSW11-1951 CIP No. 50802

This project is located in Leland Lane between Evergreen Drive and 32nd Street and in Rushmore Street between West St. Patrick Street and Shamber Street.

The project includes reconstruction of the water mains and sanitary sewer mains, expanding the storm sewer system, and reconstructing the streets.

The project is needed to replace the water mains and sanitary sewer mains which are in poor condition and have reached the end of their useful life. The storm sewer system will be expanded to extend the length of Leland Lane.

Staff proposes to hire a Consultant Engineer to be responsible for designing the project, providing bidding services, and providing construction observation, administration, and project closeout.

The project is funded from the Water Enterprise, Sewer Enterprise and Drainage Funds. The project is estimated to cost \$1,154,500 which includes design and construction costs.

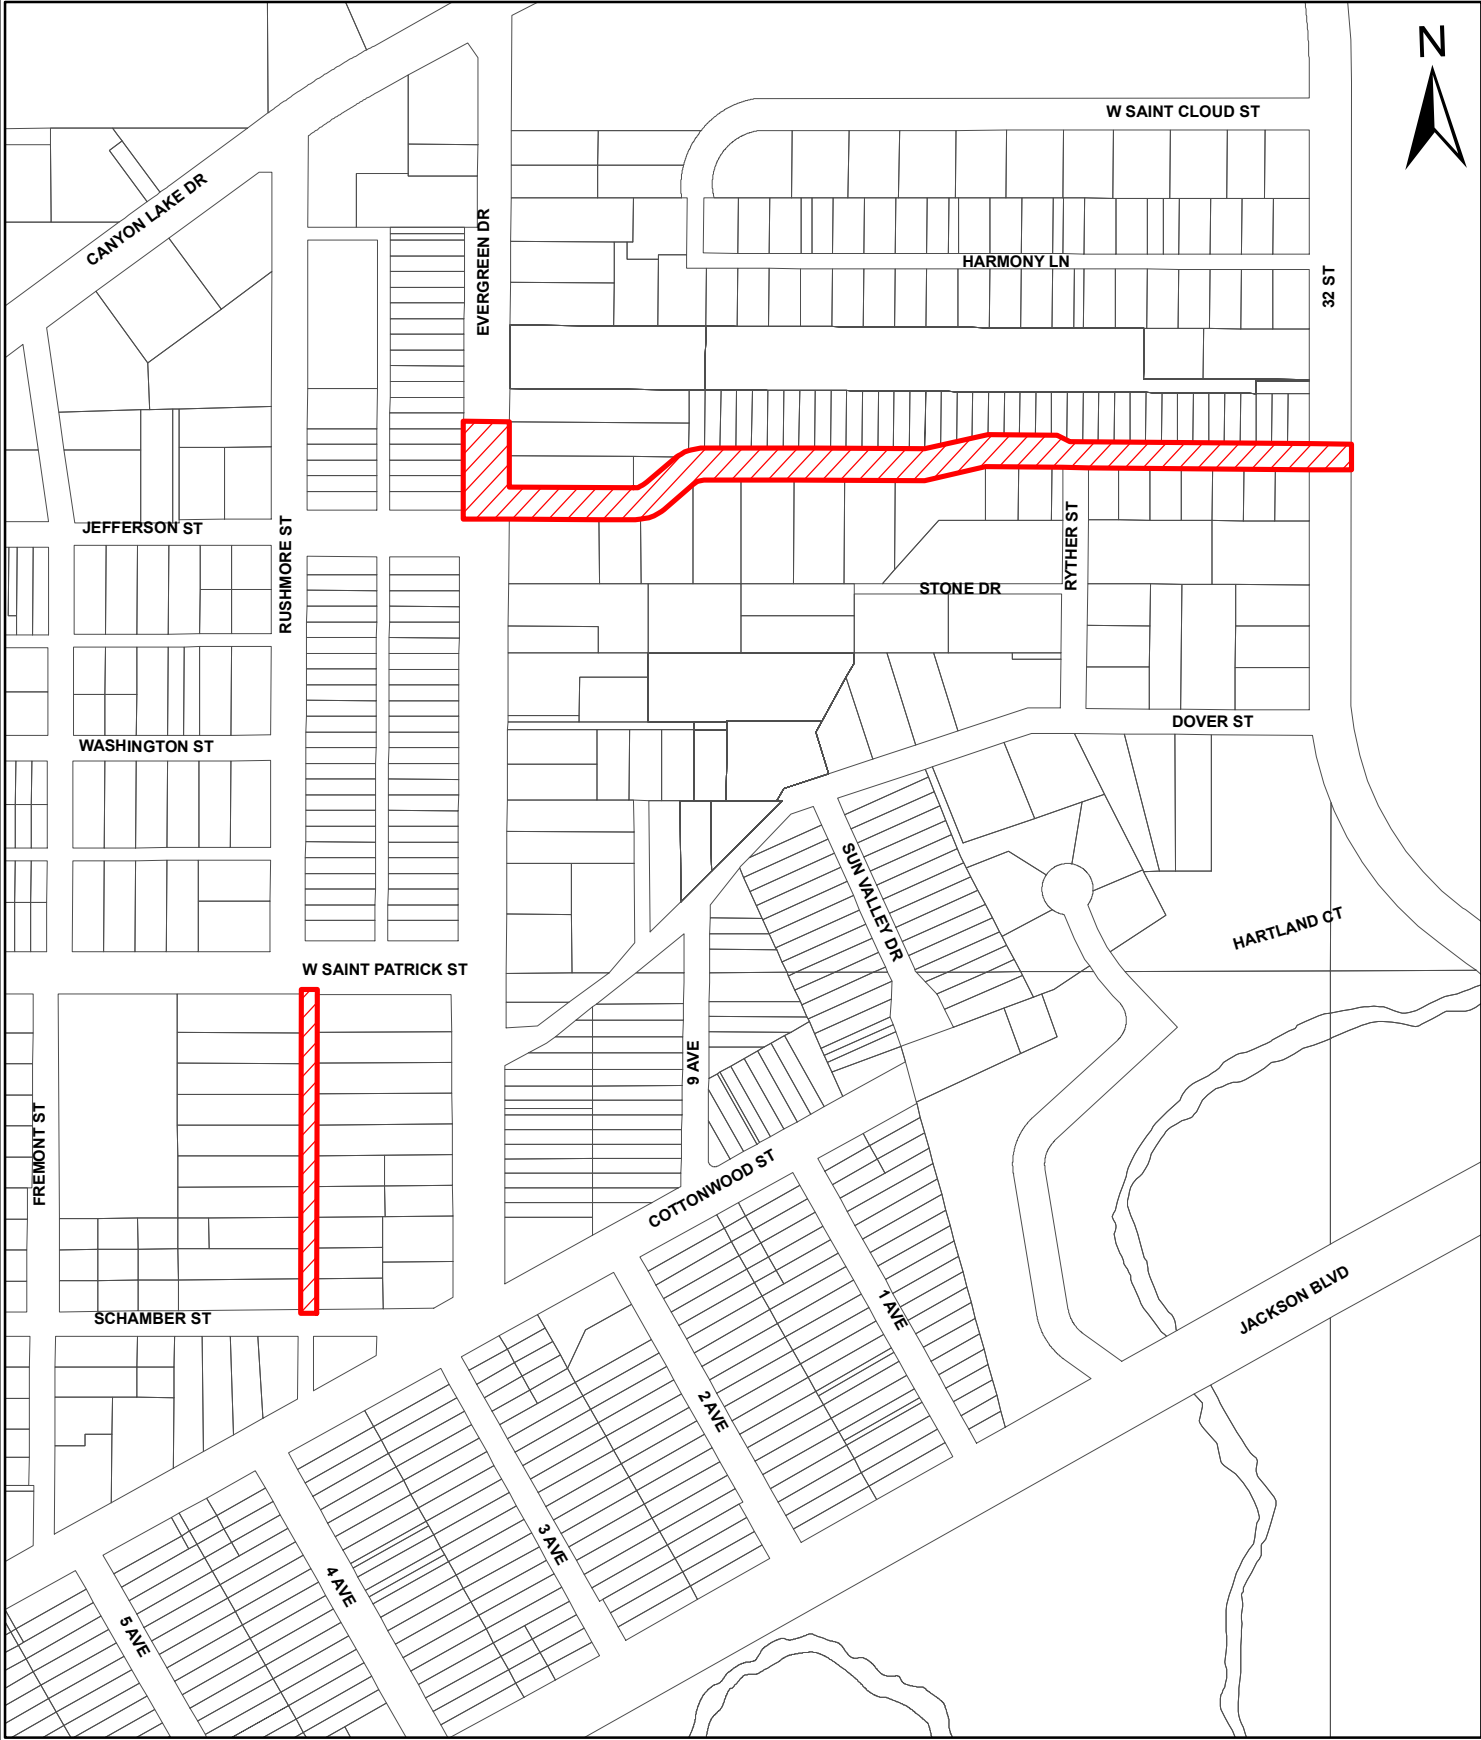

Staff proposes to bid the project in 2012 and construct the project in 2012 - 2013.

Dale Tech, PE
City Engineer

CC: Robert Ellis, Public Works Director
