Re: Request Authorization to Seek Proposals for Memorial Park and Civic Center Irrigation Improvements Project

This project is located between West Boulevard and Fifth Street and between North Street and Omaha Street.

The project includes a preliminary study of the condition of the existing irrigation systems, and the potential of converting them to a untreated water source, and designing the system.

The project would remove the irrigation systems from the existing city water system and reconstruct the systems as recommended in the preliminary study.

Staff proposes to hire a Consultant Engineer to be responsible for preparing a preliminary study, designing the project, providing bidding services, and providing construction observation, administration, and project closeout.

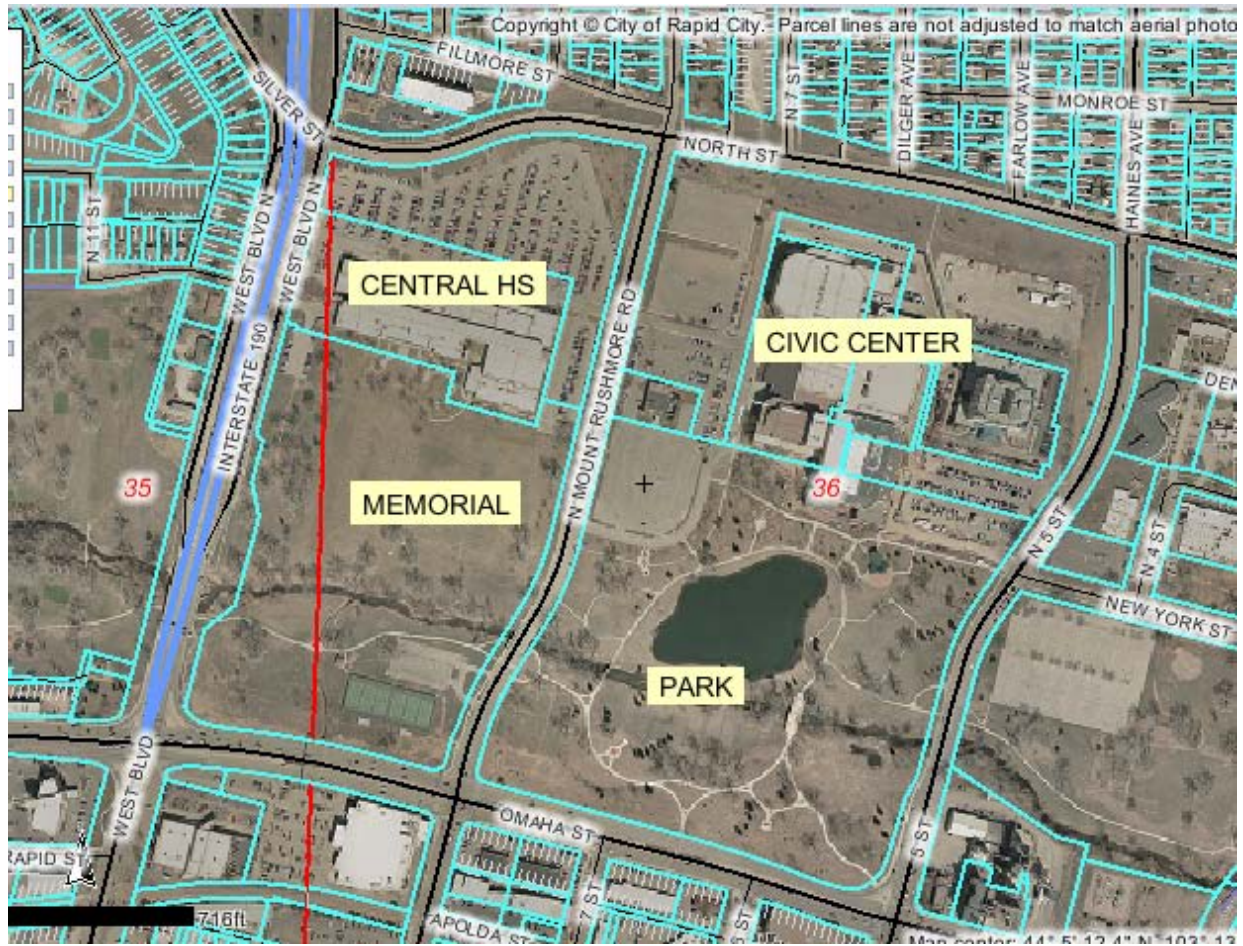

The project is funded from the Parks and Recreation Improvements Fund. The project is estimated to cost \$400,000 which includes design and construction costs.

Staff proposes to bid and construct the project in 2012.

Dale Tech, PE
City Engineer
