Public Works Committee/Common Council

Re: Request Authorization to Seek Proposals for Engineering Services for the West Chicago Street Utilities Reconstruction Project, 12-2022 / CIP #50448

This project includes the reconstruction of West Chicago Street from Sturgis Road to Sheffer Street and will include street, drainage and utility work within the corridor. The project will include installation of a water transmission main, replacement of existing utilities, street reconstruction including sidewalk from Sturgis Road to Saint Onge Street and bike lanes the entire length of the Project.

Staff proposes to hire a Consultant to design the water and sewer mains within the project area, review the design of storm sewer and side streets by SDDOT for compliance with City requirements and to study the water and sewer needs in the neighborhood southwest of the West Chicago Street & Sturgis Road intersection.

The project is funded from the Water Enterprise, Sewer Enterprise, CIP Streets and CIP Drainage funds. The City portion of the project is estimated to cost \$1,580,000 which includes design and construction costs.

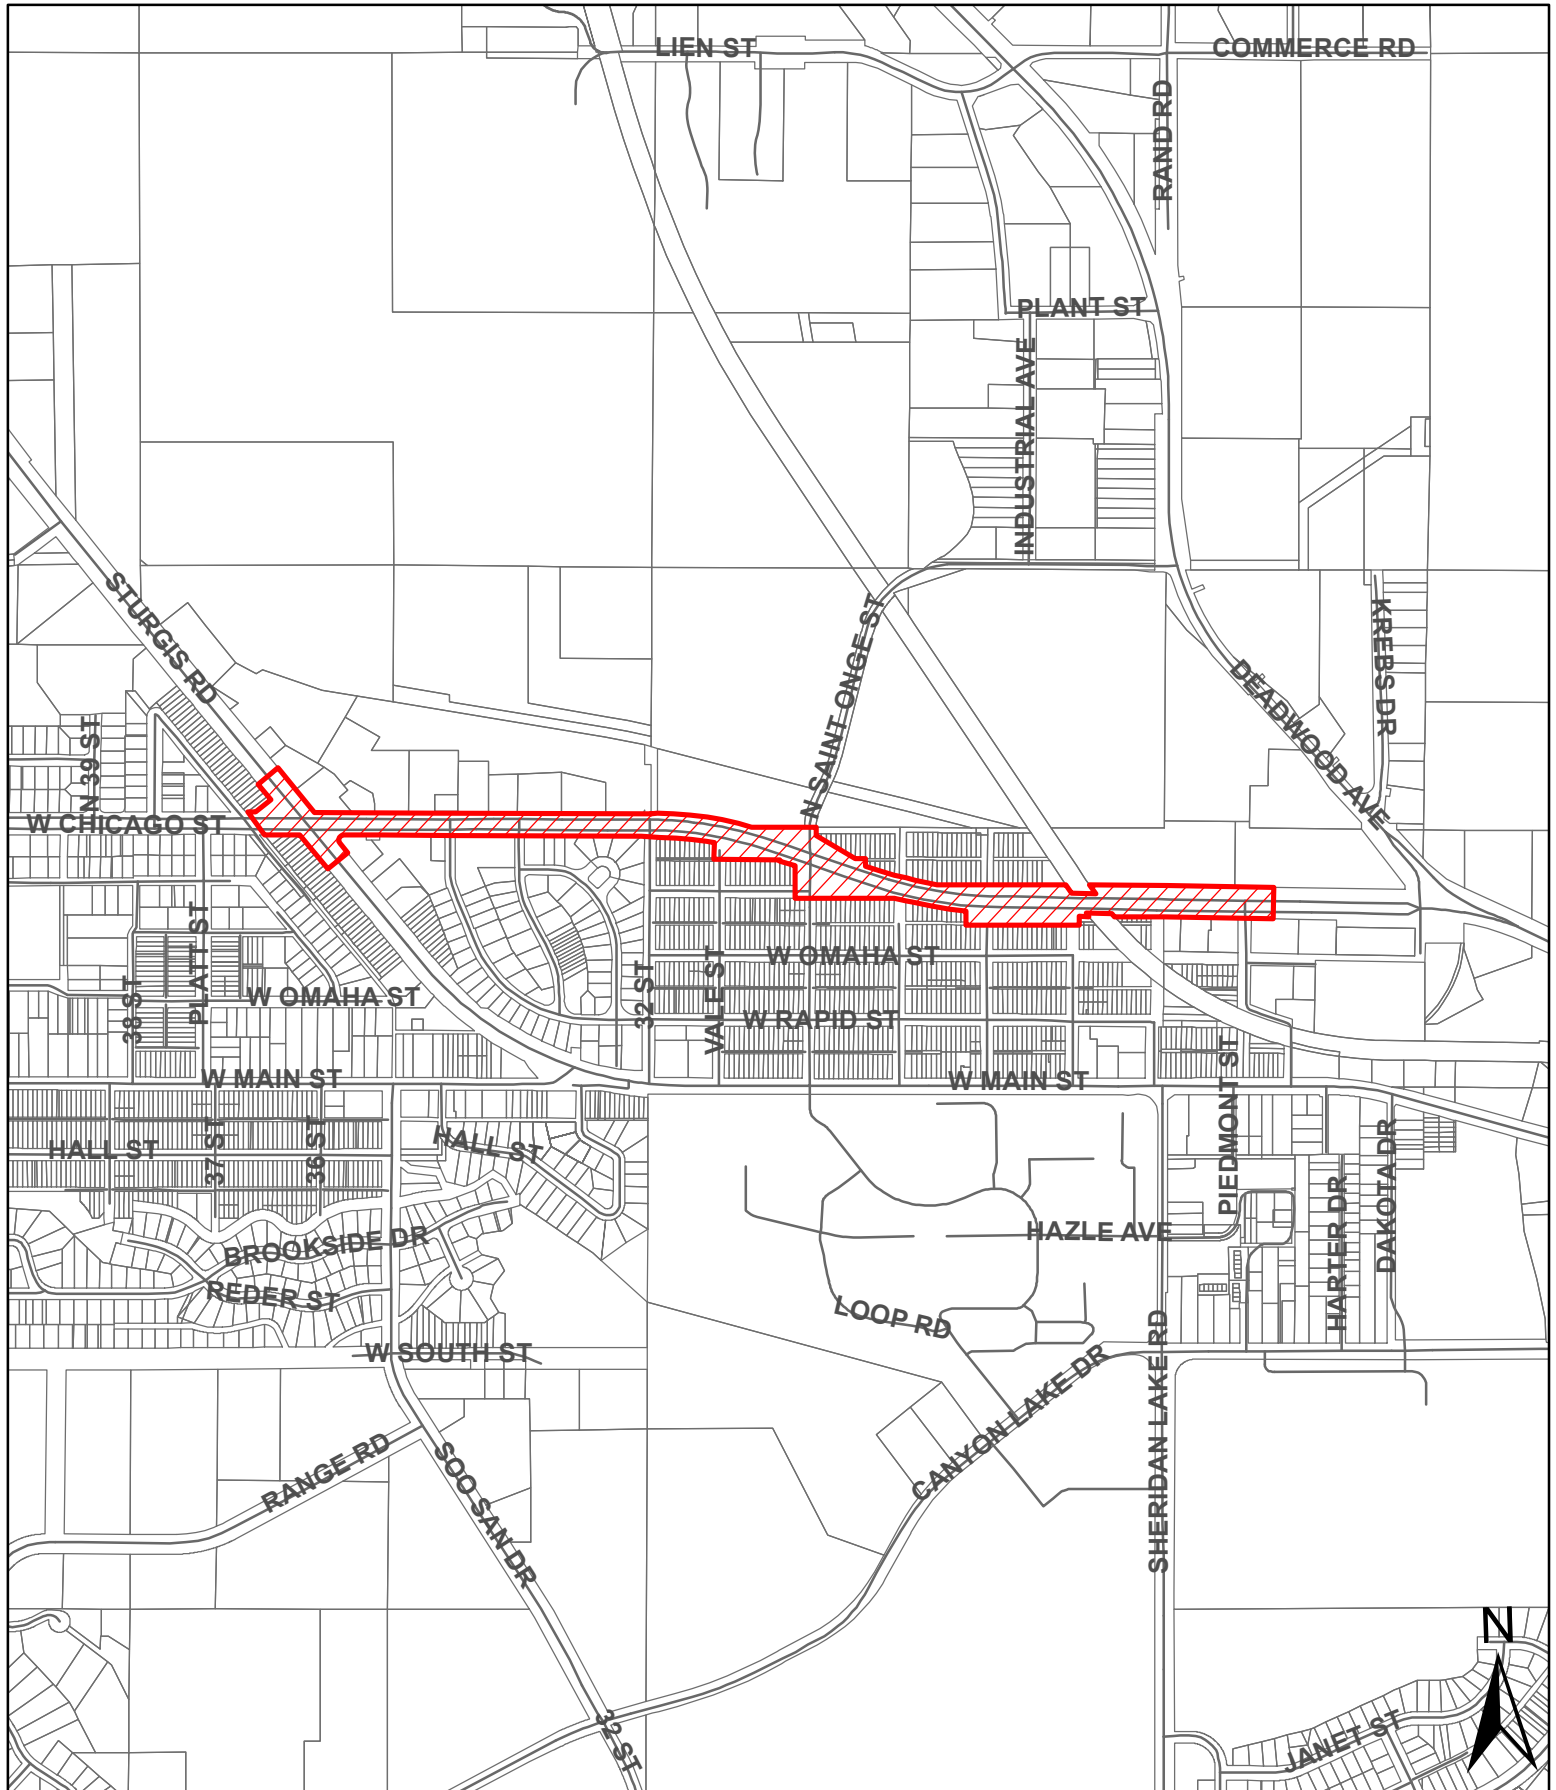

Staff proposes to bid the water transmission main Project from Saint Onge Street to Sheffer Street in 2013 and the remaining work in conjunction with the SDDOT project in 2014.

Dale Tech, PE/LS  
City Engineer
