

REQUEST AUTHORIZATION FOR MAYOR AND FINANCE OFFICER TO SIGN PROFESSIONAL SERVICES AGREEMENT OR AMENDMENT

Date: March 5, 2013

Project Name & Number: Robbinsdale Area Utility and Street Reconstruction
Project No. 12-2063

CIP #: 50421.3-
2, 3 & 4

Project Description: To provide professional engineering services.

Consultant: Sperlich Consulting, Inc.

Original Contract Amount: \$332,480.00	Original Contract Date: March 18, 2013	Original Completion Date: June 30, 2016
---	---	--

Addendum No:

Amendment Description:

Current Contract Amount: _____	Current Completion Date: _____
Change Requested: _____	
New Contract Amount: _____ \$0.00	New Completion Date: _____

Funding Source This Request:

Agreement Between City of Rapid City and Sperlich Consulting, Inc. for Design and Bidding Professional Services for Robbinsdale Area Utility and Street Reconstruction, Project No. 12-2063 / CIP No. 50421.3-2, 3 & 4.

AGREEMENT made _____, 20___, between the City of Rapid City, SD (City) and Sperlich Consulting, Inc., (Engineer), located at 821 Columbus Street, Suite 1 Rapid City, SD 57701. City intends to obtain services for design and bidding, Project No.12-2063, CIP No. 50421-3.2, 3 & 4. The scope of services is as described in Exhibits A and B.

The City and the Engineer agree as follows:

The Engineer shall provide professional engineering services for the City in all phases of the Project as defined in Exhibits A and B, serve as the City's professional engineering representative for the Project, and give professional engineering consultation and advice to the City while performing its services.

Section 1—Basic Services of Engineer

1.1 General

- 1.1.1 The Engineer shall perform professional services described in this agreement, which include customary engineering services. Engineer intends to serve as the City's professional representative for those services as defined in this agreement and to provide advice and consultation to the City as a professional. Any opinions of probable project cost, approvals, and other decisions provided by Engineer for the City are rendered on the basis of experience and qualifications and represent Engineer's professional judgment.
- 1.1.2 All work shall be performed by or under the direct supervision of a professional Engineer licensed to practice in South Dakota.
- 1.1.3 All documents including Drawings and Specifications provided or furnished by Engineer pursuant to this Agreement are instruments of service in respect of the Project and Engineer shall retain an ownership therein. Reuse of any documents pertaining to this project by the City on extensions of this project or on any other project shall be at the City's risk. The City agrees to defend, indemnify, and hold harmless Engineer from all claims, damages, and expenses including attorney's fees arising out of such reuse of the documents by the City or by others acting through the City.

1.2 Scope of Work

The Engineer shall:

- 1.2.1 Consult with the City, other agencies, groups, consultants, and/or individuals to clarify and define requirements for the Project and review available data.
- 1.2.2 Perform the tasks described in the Scope of Services. (See Exhibits A and B.)
- 1.2.3 Conduct a location survey of the Project to the extent deemed necessary to provide adequate site information.
- 1.2.4 Prepare a report presenting the results of the study as outlined in the scope of services.

Section 2—Information Provided by City

The City will provide any information in its possession for the project at no cost to the Engineer.

Section 3—Notice to Proceed

The City will issue a written notification to the Engineer to proceed with the work. The Engineer shall not start work prior to receipt of the written notice. The Engineer shall not be paid for any work performed prior to receiving the Notice to Proceed.

Section 4—Mutual Covenants

4.1 General

- 4.1.1 The Engineer shall not sublet or assign any part of the work under this Agreement without written authority from the City.
- 4.1.2 The City and the Engineer each binds itself and partners, successors, executors, administrators, assigns, and legal representatives to the other party to this agreement and to the partners, successors, executors, administrators, assigns, and legal representatives of such other party, regarding all covenants, agreements, and obligations of this agreement.
- 4.1.3 Nothing in this agreement shall give any rights or benefits to anyone other than the City and the Engineer.
- 4.1.4 This agreement constitutes the entire agreement between the City and the Engineer and supersedes all prior written or oral

understandings. This agreement may only be amended, supplemented, modified, or canceled by a duly executed written instrument.

- 4.1.5 The Engineer shall make such revisions in plans which may already have been completed, approved, and accepted by the City, as are necessary to correct Engineer's errors or omissions in the plans, when requested to do so by the City, without extra compensation therefore.
- 4.1.6 If the City requests that previously satisfactorily completed and accepted plans or parts thereof be revised, the Engineer shall make the revisions requested by the City. This work shall be paid for as extra work.
- 4.1.7 If the City changes the location from the one furnished to the Engineer, or changes the basic design requiring a new survey for the portions so changed, the redesign will be paid for as extra work.
- 4.1.8 The City may at any time by written order make changes within the general scope of this Agreement in the work and services to be performed by the Engineer. Any changes which materially increase or reduce the cost of or the time required for the performance of the Agreement shall be deemed a change in the scope of work for which an adjustment shall be made in the Agreement price or of the time for performance, or both, and the Agreement shall be modified in writing accordingly. Additional work necessary due to the extension of project limits shall be paid for as extra work.
- 4.1.9 Extra work, as authorized by the City, will be paid for separately and be in addition to the consideration of this Section.
- 4.1.10 For those projects involving conceptual or process development services, activities often cannot be fully defined during the initial planning. As the project does progress, facts and conditions uncovered may reveal a change in direction that may alter the scope of services. Engineer will promptly inform the City in writing of such situations so that changes in this agreement can be renegotiated.
- 4.1.11 This Agreement may be terminated (a) by the City with or without cause upon seven days' written notice to the Engineer and (b) by the Engineer for cause upon seven days' written notice to the City. If the City terminates the agreement without cause, the Engineer will be paid for all services rendered and all reimbursable expenses incurred prior to the date of termination.

If termination is due to the failure of the Engineer to fulfill its agreement obligations, the City may take over the work and complete it. In such case, the Engineer shall be liable to the City for any additional cost to the extent directly resulting from Engineer's action.

- 4.1.12 The City or its duly authorized representatives may examine any books, documents, papers, and records of the Engineer involving transactions related to this agreement for three years after final payment. All examinations will be performed at reasonable times, with proper notice. Engineer's documentation will be in a format consistent with general accounting procedures.
- 4.1.13 The City shall designate a representative authorized to act on the City's behalf with respect to the Project. The City or such authorized representative shall render decisions in a timely manner pertaining to documents submitted by the Engineer in order to avoid unreasonable delay in the orderly and sequential progress of the Engineer's services.
- 4.1.14 Costs and schedule commitments shall be subject to renegotiation for delays caused by the City's failure to provide specified facilities or information or for delays caused by other parties, excluding sub-contractors and sub-consultants, unpredictable occurrences including without limitation, fires, floods, riots, strikes, unavailability of labor or materials, delays or defaults by suppliers of materials or services, process shutdowns, acts of God, or the public enemy, or acts of regulations of any governmental agency or any other conditions or circumstances beyond the control of the City or Engineer. Temporary delays of services caused by any of the above which results in additional costs beyond those outlined may require renegotiation of this agreement.
- 4.1.15 The City will give prompt written notice to the Engineer if the City becomes aware of any fault or defect in the Project or nonconformance with the Project Documents.
- 4.1.16 Unless otherwise provided in this Agreement, the Engineer and the Engineer's consultants shall have no responsibility for the discovery, presence, handling, removal or disposal of, or exposure of persons to hazardous materials in any form at the project site, including but not limited to asbestos products, polychlorinated biphenyl (PCB), or other toxic substances.
- 4.1.17 In the event asbestos or toxic materials are encountered at the jobsite, or should it become known in any way that such materials may be present at the jobsite or any adjacent areas that may affect

the performance of Engineer's services, Engineer may, at their option and without liability for consequential or any other damages, suspend performance of services on the project until the City retains appropriate specialist CONSULTANT(S) or contractor(s) to identify, abate, and/or remove the asbestos or hazardous or toxic materials.

- 4.1.18 This agreement, unless explicitly indicated in writing, shall not be construed as giving Engineer the responsibility or authority to direct or supervise construction means, methods, techniques, sequences, or procedures of construction selected by any contractors or subcontractors or the safety precautions and programs incident to the work of any contractors or subcontractors.
- 4.1.19 Neither the City nor the Engineer, nor its Consultants, shall hold the other liable for any claim based upon, arising out of, or in any way involving the discharge, dispersal, release or escape of smoke, vapors, soot, fumes, acids, alkalis, toxic chemicals, liquids, or gases, waste materials, or other irritants, contaminants, or pollutants.
- 4.1.20 Neither the City nor the Engineer, nor its Consultants, shall hold the other liable for any claim based upon, arising out of, or any way involving the specification or recommendation of asbestos, in any form, or any claims based upon use of a product containing asbestos.
- 4.1.21 Engineer hereby represents and warrants that it does not fail or refuse to collect or remit South Dakota or City sales or use tax for transactions which are taxable under the laws of the State of South Dakota.

4.2 City of Rapid City NonDiscrimination Policy Statement

In compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination act of 1975, the Americans with Disabilities Act of 1990, and other nondiscrimination authorities it is the policy of the City of Rapid City, 300 Sixth Street, Rapid City, SD 57701-5035, to provide benefits, services, and employment to all persons without regard to race, color, national origin, sex, disabilities/handicaps, age, or income status. No distinction is made among any persons in eligibility for the reception of benefits and services provided by or through the auspices of the City of Rapid City.

Engineer will permit access to any and all records pertaining to hiring and employment and to other pertinent data and records for the purpose of enabling the Commission, its agencies or representatives, to ascertain compliance with the above provisions.

This section shall be binding on all subcontractors or suppliers.

Section 5—Payments to the Engineer

5.1 Schedule of Pay Rates

The City will pay the Engineer for services rendered or authorized extra work according to the Engineer's hourly rate schedule. (See Exhibit C.)

5.2 Fee

The maximum amount of the fee for the services as detailed in Section 1.2 shall not exceed \$332,480.00 unless the scope of the project is changed as outlined in Section 4. If expenses exceed the maximum amount, the Engineer shall complete the design as agreed upon here without any additional compensation. Sub task dollar amounts may be reallocated to other tasks as long as the total fee is not exceeded. Prime consultant may not mark up sub-consultant or sub-contractor services.

5.3 Progress Payments

Monthly progress payments shall be processed by the City upon receipt of the claim as computed by the Engineer based on work completed during the month at the rates established in Section 5.1 and approved by the City.

Net payment to the Engineer shall be due within forty-five (45) days of receipt by the City.

Section 6—Completion of Services

The Engineer shall complete services on or before June 30, 2016 based on an award date of March 18, 2013.

Section 7—Insurance Requirements

7.1 Insurance Required

The Engineer shall secure the insurance specified below. The insurance shall be issued by insurance company(s) acceptable to the City and may be in a policy or policies of insurance, primary or excess. Certificates of all required insurance including any policy endorsements shall be provided to the City prior to or upon the execution of this Agreement.

7.2 Cancellation

The Engineer will provide the City with at least 30 days' written notice of an insurer's intent to cancel or not renew any of the insurance coverage. The Contractor agrees to hold the City harmless from any liability, including

additional premium due because of the Contractor's failure to maintain the coverage limits required.

7.3 City Acceptance of Proof

The City's approval or acceptance of certificates of insurance does not constitute City assumption of responsibility for the validity of any insurance policies nor does the City represent that the coverages and limits described in this agreement are adequate to protect the Engineer, its consultants or subcontractors interests, and assumes no liability therefore. The Engineer will hold the City harmless from any liability, including additional premium due, because of the Engineer's failure to maintain the coverage limits required.

7.4 Specific Requirements

7.4.1 Workers' compensation insurance with statutory limits required by South Dakota law. Coverage B-Employer's Liability coverage of not less than \$500,000 each accident, \$500,000 disease-policy limit, and \$500,000 disease-each employee.

7.4.2 Commercial general liability insurance providing occurrence form contractual, personal injury, bodily injury and property damage liability coverage with limits of not less than \$1,000,000 per occurrence, \$2,000,000 general aggregate, and \$2,000,000 aggregate products and completed operations. If the occurrence form is not available, claims-made coverage shall be maintained for three years after completion of the terms of this agreement. The policy shall name the City and its representatives as an additional insured.

7.4.3 Automobile liability insurance covering all owned, nonowned, and hired automobiles, trucks, and trailers. The coverage shall be at least as broad as that found in the standard comprehensive automobile liability policy with limits of not less than \$1,000,000 combined single limit each occurrence. The required limit may include excess liability (umbrella) coverage.

7.4.4 Professional liability insurance providing claims-made coverage for claims arising from the negligent acts, errors or omissions of the Engineer or its consultants, of not less than \$1,000,000 each occurrence and not less than \$1,000,000 annual aggregate. Coverage shall be maintained for at least three years after final completion of the services.

Section 8—Hold Harmless

The Engineer hereby agrees to hold the City harmless from any and all claims or liability including attorneys' fees arising out of the professional services furnished under this Agreement, and for bodily injury or property damage arising out of services furnished under this Agreement, providing that such claims or liability are the result of a negligent act, error or omission of the Engineer and/or its employees/agents arising out of the professional services described in the Agreement.

Section 9—Independent Business

The parties agree that the Engineer operates an independent business and is contracting to do work according to his own methods, without being subject to the control of the City, except as to the product or the result of the work. The relationship between the City and the Engineer shall be that as between an independent contractor and the City and not as an employer-employee relationship. The payment to the Engineer is inclusive of any use, excise, income or any other tax arising out of this agreement.

Section 10-Indemnification

If this project involves construction and Engineer does not provide consulting services during construction including, but not limited to, onsite monitoring, site visits, site observation, shop drawing review and/or design clarifications, City agrees to indemnify and hold harmless Engineer from any liability arising from the construction activities undertaken for this project, except to the extent such liability is caused by Engineer's negligence.

Section 11-Controlling Law and Venue

This Agreement shall be subject to, interpreted and enforced according to the laws of the State of South Dakota, without regard to any conflicts of law provisions. Parties agree to submit to the exclusive venue and jurisdiction of the State of South Dakota, 7th Judicial Circuit, Pennington County.

Section 12-Severability

Any unenforceable provision herein shall be amended to the extent necessary to make it enforceable; if not possible, it shall be deleted and all other provisions shall remain in full force and effect.

Section 13—Funds Appropriation

If funds are not budgeted or appropriated for any fiscal year for services provided by the terms of this agreement, this agreement shall impose no obligation on the City for payment. This agreement is null and void except as to annual payments herein agreed upon for which funds have been budgeted or appropriated, and no right of action or

damage shall accrue to the benefit of the Engineer, its successors or assignees, for any further payments. For future phases of this or any project, project components not identified within this contract shall not constitute an obligation by the City until funding for that component has been appropriated.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement as of the day and year first above written.

ROBBINSDALE AREA UTILITY AND STREET RECONSTRUCTION PROJECT NO. 12-2063 / CIP NO. 50421.3-2 CIP NO. 50421.3-3 CIP NO. 50421.3-4

BACKGROUND:

The City of Rapid City Public Works Department, Engineering Services Division, has determined a need to secure professional design services including Preliminary Design Services, Final Design Services, Bidding Services, Basic Construction Services, and Expanded Construction Services for the Robbinsdale Area Utility and Street Reconstruction Project.

The selected consultant will provide services related to reconstructing water and sewer mains and service lines, storm sewer improvements, and reconstructing the streets. Temporary construction easement acquisition will likely be required for construction of this project. The consultant will be required to prepare easement exhibits, provide copies of deeds for the City to prepare the easement documents, and obtain the easements. The consultant will be responsible for meeting individually with property owners regarding easements and general project coordination.

City staff from the Engineering Services Division and the Utility Maintenance Group will be available to assist in providing information for this project.

It is anticipated that the improvements will include the following:

1. Reconstruct the sanitary sewer mains in with new eight inch (8") sewer mains. Reconstruct the sanitary sewer service lines to the property lines.
2. Reconstruct the water mains with minimum sized water mains as stipulated in the Infrastructure Design Criteria Manual. Reconstruct the water service lines to the property lines and install new curb stops.
3. Reconstruct the streets with new curb and gutter and asphalt pavement. Design the asphalt pavement section and streets geometry. Determine if edge drains and possibly groundwater drains should be installed. Some of the streets have curbside sidewalks which will be moved to property line sidewalk and be made ADA compliant. There are several trees that may interfere with the installation of property line sidewalk and the consultant will be responsible for contacting the homeowners and informing them about the project and of the City's tree replacement policy.
4. Storm sewer is proposed to be extended in Grandview Drive north from Fairmont Boulevard and in Wisconsin Avenue south from Oakland Street. The pipe size and inlet locations shall be designed by the consultant to meet the Infrastructure Design Criteria Manual requirements as needed.

Sperlich Consulting, Inc. was selected through the City's "Consultant Selection" process to provide engineering services for Task 1 through Task 3 for the above referenced project. Tasks 4 and 5 may be combined as a separate contract.

TASK 1 - PRELIMINARY DESIGN SERVICES:

This task consists of all services necessary to take the project from beginning through the Preliminary Design submittal stage, and may include the following itemized services.

- 1.1 Kick-off Conference: The consultant shall meet with City staff to detail project concept and scope. The consultant shall prepare an agenda, take minutes, and distribute minutes.
- 1.2 Review background information listed in this RFP, and any other resources as necessary.
- 1.3 Perform site surveys sufficient for design plan preparation. The route and topography survey shall be tied to at least two City of Rapid City Monument Control system monuments utilizing State Plane coordinates.
- 1.4 Identify right-of-way (ROW) and permanent and temporary construction easements acquisition needs. Include size and extent of such ROW and easements and contact information of property owners.
- 1.5 Prepare preliminary opinion of probable construction costs for the project.
- 1.6 Recommend location and extent of geotechnical services investigations necessary to complete design. Geotechnical services typically will be a sub consultant to the Consultant and payment for geotechnical services is the responsibility of the Consultant.
- 1.7 Prepare preliminary plan and profile sheets including locations of existing and new utilities and street alignment. Show existing utilities locations with probable depths.
- 1.8 Attend submittal review meeting with City staff, if necessary.
- 1.9 Attend Public Works and Council meetings as necessary.
- 1.10 Develop and distribute a survey questionnaire to property owners adjacent to proposed construction areas approximately 3 months or more ahead of soliciting bids for construction. The questionnaire should be developed to obtain information on site-specific concerns such as landscaping or irrigation systems, service line locations, special needs such as access considerations during construction, or history of utility or infrastructure problems at the property. Questionnaires would be returned to and evaluated by the consultant, who would follow up with appropriate individual contact with property owners prior to completion of 100% plans and contract documents to review project considerations that may be addressed or mitigated by the project work. This work may be better completed under Task 2 and shall be established during contract negotiations.
- 1.11 ~~Arrange and conduct an informational meeting to discuss paving the unpaved portion of Rushmore Street with the affected property owners. A preliminary plan and cost estimate shall be prepared.~~
- 1.12 Meet with individual property owners regarding ROW and permanent and temporary easement needs and regarding specific project issues and components.
- 1.13 Identify non-conforming water and sewer service lines. Include a map in the Conceptual Design Submittal showing a proposal to eliminate the non-conforming status.
- 1.14 Conceptual Design Submittal
The Conceptual Design Submittal shall generally consist of the following documents:
 - A. Conceptual Design Report
Prepare a Conceptual Design Report: The consultant shall establish and indicate project specific design criteria and standards within the Conceptual Design Report.

The consultant shall submit all design assumptions for pipe sections, water, sewer, and storm sewer locations, pavement sections, etc. The Consultant shall include design life, design criteria, and reference of design resources. The Consultant shall use the City Infrastructure Design Criteria Manual to establish design criteria and standards.

The Conceptual Design Report shall evaluate and recommend pavement design; based on a life cycle cost analysis, preliminary horizontal and vertical alignments for utilities, roadways, project phasing and limits. The project's geotechnical report shall be included within the Conceptual Project Design Report and include soil classifications, N values, water levels, proctors, CBR's, resistivity tests, pavement design, and testing recommendations. The Consultant shall elaborate on other project components as necessary.

A probable opinion of construction costs for the project(s) shall be included. The costs shall be itemized based on the City's standard bid items and appropriate contingency item allowance.

The consultant shall establish and indicate project specific design criteria and standards within the Conceptual Design Report. The Conceptual Design Report shall provide review of compliance with City's Standard Specifications for construction of the project(s). Evaluate and recommend preliminary horizontal and vertical alignment for utilities, roadways, and other public improvements. Use the City Draft Infrastructure Design Criteria Manual to establish design criteria and standards.

Identify the existing right-of-way (ROW) location and any ROW or easements necessary for the Project. Include size and extent of such ROW and easements and contact information of property owners.

Identify all non-conforming water and sewer service lines and include a proposed solution to making them conform with the City's current standards. Submit three (3) copies and a PDF version of the Conceptual Design Report and preliminary plans and specifications to City of Rapid City's project manager for review and comment.

B. Conceptual Drawings

Provide three (3) copies and a PDF version of the conceptual drawings. The conceptual drawings shall contain the following sheets:

- Cover Sheet – Note the index of Sheets indicating the anticipated drawing sheets shall be provided.
- Survey Control Sheet
- Anticipated traffic control phasing and erosion control measures
- Property Layout and Land Ownership
- Plan and Profile Sheets - Show existing and proposed utility mains and existing services, storm sewers, driveway locations, fittings, and proposed surfacing and drainage items. The utilities should be shown in profile as well. Design Criteria elements like profile grades, "K" values, vertical and horizontal curve data should be included.
- Anticipated Rapid City Standard Details

- Special Details - Conceptual layouts for special/critical elements for example buildings, special drainage structures, pump facilities, etc.
- Plan sheets shall be prepared utilizing the latest City of Rapid City Drafting Standards.

TASK 2 - FINAL DESIGN SERVICES:

This task consists of all services necessary to take project from Task 1 Preliminary Design Services through the Final Design Services, and may include the following itemized services.

- 2.1 Address City comments from the Task 1 City review(s) and finalize Conceptual Design Report. The Conceptual Design Report should be now titled "Project Design Report",
- 2.2 Negotiate and complete ROW and easement(s) acquisition - prepare easement and ROW exhibits as necessary, conduct property owner meetings for easement and ROW acquisition, and document acquisition meetings.
- 2.3 Determine removal limits with approval of City of Rapid City representative.
- 2.4 Coordinate with the geotechnical engineer to complete these services, and provide a geotechnical report to be included in the Project Design Report and project plans or specifications,
- 2.5 Incorporate design features as necessary to meet the requirements outlined in the Project Design Report,
- 2.6 Incorporate ADA compliance items, for example fillet, driveway and sidewalk improvements,
- 2.7 Incorporate Erosion and Sediment Control items,
- 2.8 Provide a complete stormwater pollution prevention narrative which will include detailed erosion and sediment control measures and specifications. Provide a complete erosion and sediment control site plan which includes station and offset locations for each implemented measure. Include both temporary and permanent erosion and sediment control measures. Include an erosion and sediment control sequence of implementation and phasing schedule. Each erosion control item shall be bid separately. The consultant shall prepare project supplemental specifications for erosion and sediment control devices in accordance with City of Rapid City Standard Specification format.
- 2.9 ~~If federally funded, incorporate NEPA requirements, wetland mitigation, monetary, ROW certification, environmental certification, SHPO, Architectural, Catx noise analysis, FONSI, etc.~~
- 2.10 Provide two (2) copies and a PDF version of the finalized Project Design Report,
- 2.11 Provide three (3) copies of the Final Design Services submittal. The submittal shall consist of complete plans, specifications, contract documents, and opinion of probable construction cost to the City of Rapid City's project manager for review. The Final Design Services submittal will be made to the City when the consultant believes the plans, specifications, contract documents, and opinion of probable construction cost are 100% complete.
- 2.12 Address 100% submittal staff comments as necessary.
- 2.13 Provide complete plans and specifications for a unit price construction contract. Plan sheets shall be prepared utilizing the latest City of Rapid City Drafting Standards.
- 2.14 Plans documents shall adhere to current City of Rapid City guidelines.
- 2.15 Staking information shall include either of the following formats:

On the Plans

- Station offsets for all items of work requiring field staking. In tabular form on a plan sheet (schedule)

- Coordinates and description of inter-visible control points.
 - Coordinates of all items of work requiring field staking.
 - Benchmark information shall be provided on each sheet.
- 2.16 Provide project layout to include lot lines (front and side) and addresses of all properties (adjacent to construction, or alternatively, in service area). Identify if property is owner occupied or a rental.
- 2.17 Provide detailed traffic control plans showing all devices required for a MUTCD compliant plan. Show all streets and alleys that may be impacted by this project. Show all existing signage, pavement markings, etc. All work zones, road closures, lane closures, and pavement marking removals shall be indicated on the plan. A detailed layout will be included for each phase of multi-phased projects. The traffic control sequence of implementation and phasing schedule shall coincide with erosion and sediment control sequence of implementation and phasing schedule. Each traffic control device shall be bid separately. The City will provide an electronic version of an aerial photo for the selected consultant's use. The consultant shall prepare project supplemental specifications for traffic control devices in accordance with City of Rapid City Standard Specification format.
- 2.18 Provide a Project Sequence of implementation and phasing schedule which shall include such items as traffic control, erosion and sediment control, utility installations, paving, restoration, and construction milestones.
- 2.19 Coordinate directly with utility companies' engineering divisions to ensure that all existing utilities are completely and accurately identified and located in the field; that pertinent information regarding depth, material, size, etc. are noted on the plans; and that conflicts requiring relocation of utilities or special construction techniques are fully specified in the contract documents. Preliminary plans shall be provided to the pertinent utilities for comment at the time they are complete followed by a specific private utility coordination meeting in two to three weeks.
- 2.20 Notify the City Project Manager if private utilities will need to be relocated so PM can formally notify the utilities to relocate.
- 2.21 If desiring exceptions from City requirements or specifications, it is the Consultant's responsibility to request and secure exceptions. Failure by the City to comment on a nonconforming item during a review does not constitute the granting of an exception.
- 2.22 Provide detailed specifications supplementing the City of Rapid City Standard Specifications, as necessary. Typically project drawing specific issues should be indicated as a General Note on the drawings. Material types and material specific items would be included as a detailed specification.
- 2.23 Prepare any and all permits with exhibits the City will need to execute for the project.
- 2.24 Identify permits that will be required for the Contractor. Identify permit costs and indicate if any permit costs are paid for directly by the owner or if it is a Contractor cost. Typically all permit costs are the Contractor's obligation.
- 2.25 Prepare final "Engineer's Estimate" of probable construction cost for the project.
- 2.26 Deliver the following:
- Provide one (1) copy and a PDF version of bid documents including complete plans, specifications, and Engineer's Estimate of probable construction cost to the City of Rapid City's project manager for City distribution.
 - Provide complete plans on CD compatible with AutoCAD Release 2008 or newer format.
 - o Provide all topographic, control, and design points in the .dwg file and in tabular format, both on CD and on hard copy printout.

- Provide complete specifications and contract documents on CD in Microsoft Word XP or previous versions.
 - Provide a unit price cost estimate on CD in Microsoft Excel XP or previous version on the City of Rapid City “Engineer’s Estimate” form.
 - Provide Engineer’s Estimate of probable construction costs as a component of this submittal.
- 2.27 All submittals (drawings and specifications) believed by the Engineer of Record to be a final, shall contain a Certification Statement of Conformance with City Standards which shall read, “I (insert Engineer of Record’s name) Certify that I have read and understand the provisions contained in the **City of Rapid City Standard Specifications for Public Works Construction, current edition** and the **City of Rapid City’s adopted Design Criteria Manuals**. The drawings and specifications contained here within, to the best of my knowledge, were prepared in accordance with these documents or a properly executed exception to the Standard Specifications and/or Infrastructure Design Criteria Manual has been secured”. This statement shall appear on the title sheet of the drawings and on the first page of specifications after the cover sheet. The “Certification Statement of Conformance with City Specifications” shall be signed and dated by the Engineer of Record.
- 2.28 Engineer shall obtain a design exception for Infrastructure Design Criteria manual requirements as needed.
- 2.29 The City will submit plans and specifications to the Department of Environment and Natural Resources for approval, and the Consultant shall address any comments or corrections required.
- 2.30 Prior to the advertisement for bids, arrange and conduct a public open house with affected residents. The open house shall be held sufficiently ahead of the project advertisement for bids such that public comments and concerns may still be addressed within the final project documents. Notice of the open house shall be mailed to all property owners adjacent to the proposed work area(s), as well as those in the immediate area who may be directly impacted by the construction, as determined by the City. The Consultant shall tabulate the public comments and concerns and provide written recommendations for staff review regarding possible inclusion or exclusion of such requests.

TASK 3 – BIDDING SERVICES:

This task consists of all services necessary for the administration of the Bidding Services of the project, and may include the following itemized services.

- 3.1 Submit sufficient information to the City of Rapid City project manager for completion of City Advertising Authority form.
- 3.2 Provide one hard copy and a PDF version of final plans, stamped and signed by a Professional Engineer, for City printing and distribution.
- 3.3 Arrange and conduct a Pre-bid Conference. Record attendance and minutes. Distribute copies to all attendees. An example of an agenda is enclosed as Attachment Five for your information.
- 3.4 Prepare and issue addenda to the bid documents as required.
- 3.5 Attend Public Works Committee and Council Meetings as required.
- 3.6 Review Bidder’s Proposals and review and sign the City Engineering Services prepared Bid Tab, prepare an award recommendation letter to the City of Rapid City project manager, and sign a City Engineering Services prepared Award Summary.

- 3.7 Review construction contract documents and other submittals from the contractor and submit to the City of Rapid City project manager for distribution to City Attorney's for approval and signatures of the Mayor and Finance Officer.

Attn: Mr. Kale McNaboe P.E.

Subject: Cost Proposal - Geotechnical Exploration
 Proposed Robbinsdale Area Utility & Street Reconstruction
 Rapid City, South Dakota

Dear Kale:

INTRODUCTION

American Engineering Testing Inc. (AET) is pleased to provide this proposal for conducting a Geotechnical Exploration for the proposed reconstruction of several streets in the Robbinsdale area in Rapid City, South Dakota. This proposal is based on the information provided and defines the general scope, completion schedule, and estimated costs for our work.

PROJECT INFORMATION

We understand the project will include the reconstruction will include three separate areas within the Robbinsdale area. CIP 50421.3-2 will include approximately 650 feet of Maple Avenue north of its intersection with E Nevada Drive and approximately 400 feet of E Nevada Drive east of its intersection with Maple Drive. CIP 50421.3-3 will include approximately 900 feet of Wisconsin Avenue between Fairmont Boulevard and Oakland Street including the reconstruction of Nathan Court and Stearns Court both approximately 150 feet in length. CIP 50412.3-4 will include approximately 800 feet of Grandview Drive north of Fairmont Boulevard and 550 feet of E Nevada Drive between Oak Avenue and Grandview Drive.

The reconstruction of the street segments will include new sanitary sewer and water mains and new pavement with curb and gutter. We anticipate new water and sewer utilities will be placed as much as 10 feet below the new street sections. AET anticipates access to the potential drill holes will be possible for a truck mounted drill rig and support vehicle.

SCOPE OF WORK

The purpose of the geotechnical study will be to provide subsurface soil information along the project streets. This information will be used to provide information and engineering recommendations for planning and design of the project. In order to accomplish the above stated purpose, AET proposes the following scope of work:

1. Drill twelve (12) Standard Penetration Test (SPT) borings along the alignments of the respective street segments. All borings will be drilled to 15 feet below grades. The approximate locations of the borings are indicated on the attached site plan.
2. The subsurface conditions will be logged at each location and groundwater levels taken at each boring location following drilling. The borings will be advanced using either 4.25 inch I.D. Hollow Stem Auger or 4-inch flight auger. Soil samples will be collected from the borings in accordance with the procedures outlined in ASTM D3550.
3. Upon completion of drilling, one-inch diameter temporary piezometers will be installed the full depth of each boring to provide for on-going monitoring of groundwater levels. The piezometers will be backfilled with sand, topped with a thin bentonite seal and capped with a plastic manhole type cover.
4. Perform laboratory testing in accordance with the appropriate ASTM procedures to classify the soils in order to estimate the characteristic engineering and index properties, as well as strength properties of the soils. At this time we anticipate the lab work will include natural moisture content, dry density, proctors and remolded California Bearing Ratios. The work will also include five field electrical resistivity tests.
5. Provide three (3) separate reports - one for each area- (one hard copy and one electronic copy) summarizing the results of the field work, laboratory data, and engineering recommendations for use in design and construction of the project. The reports will provide recommendations for subgrade preparation, utility excavation and backfill, corrosion potential and both new asphalt and concrete pavement sections.

This proposal is exclusively for the scope of work stated above. Should the project conditions change, AET should be notified as soon as possible to review this proposal to determine if the scope of work should be modified.

FEES

Based on the scope of work defined in this proposal, the total cost of the site work, laboratory testing and report for the geotechnical study would be a lump sum of \$9,595.00 plus state and local taxes, if applicable. An approximate breakdown per area is as follows:

COST PROPOSAL GEOTECHNICAL EXPLORATION
ROBBINSDALE AREA UTILITY & STREET RECONSTRUCTION
 RAPID CITY, SOUTH DAKOTA
 FEBRUARY 21, 2012

PAGE 3 OF 3

CIP 50421.3-2	\$2,763.00
CIP 50421.3-3	\$3,634.00
CIP 50412.3-4	\$3,198.00

SCHEDULE

AET proposes to begin the geotechnical field work within five to ten days of being given written authorization to proceed. We anticipate the field work can be completed in two to three days. Laboratory testing will require approximately one week. Preliminary recommendations can be given within days following completion of drilling. The final report will be submitted within one week after the completion of the laboratory testing.

ACCEPTANCE

Please indicate your acceptance of this proposal by endorsing the enclosed copy and returning it to our office. The original proposal is intended for your records.

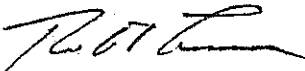

TERMS

Our services will be performed per the attached Service Agreement. Client and its authorized representatives agree that verbal authorization of our services is formal acceptance of the terms and conditions contained herein.

CLOSING

Thank you for considering American Engineering Testing (AET) for this project. If you have any questions please call our office at (605) 388-0029.

Sincerely,

Robert Temme P.E.
 Western Region Manager

SECTION 1 - RESPONSIBILITIES

1.1 - The party to whom the proposal/contract is addressed is considered the Client of American Engineering Testing, Inc. (AET). The terms and conditions stated are binding, upon acceptance, on the Client, its successors, assignees, joint ventures and third-party beneficiaries. Verbal proposal acceptance or authorizing purchase orders from the Client are considered formal acceptance of AET's terms and conditions. By signing the proposal or verbally authorizing the services, the authorizing party attests that they have the authority to legally bind the Client to agreement.

1.2 - Prior to AET performing services, Client will provide AET with all information that may affect the cost, progress, safety and performance of the services. This includes, but is not limited to, information on proposed and existing construction, all pertinent sections of contracts between Client and property owner, site safety plans or other documents which may control or affect AET's services. If new information becomes available during AET's services, Client will provide such information to AET in a timely manner. Failure of client to timely notify AET of changes to the project including, but not limited to, location, elevation, loading, or configuration of the structure or improvement will constitute a release of any liability of AET. Client will provide a representative for timely answers to project-related questions by AET.

1.3 - Services performed by AET will not relieve other persons of their responsibilities according to the contract documents or specifications, and AET will not be held responsible for work or omissions by Client or other persons. AET does not perform construction management, general contracting or surveying services and our involvement with the project does not constitute any assumption of those responsibilities. AET will not be responsible for directing or supervising the work of others, unless specifically agreed to in writing.

1.4 - Unavoidable risks are present when attempting to characterize buried subsurface conditions. Variations in soil conditions usually occur between and beyond sampled/tested locations. Even a comprehensive sampling and testing program performed in accordance with a professional standard of care may fail to detect certain conditions, because the variability of conditions cannot be seen. For similar reasons, actual environmental, geologic, and geotechnical conditions that AET characterizes to exist between sampling points may differ significantly from those that actually exist. The passage of time also must be considered, and Client recognizes that, due to natural occurrences or direct or indirect human activities at the site or distant from it, actual conditions discovered may change. The Client must recognize and accept that nothing can be done to eliminate the risks associated with these inherent limitations.

1.5 - AET is not responsible for interpretations or modifications of AET's recommendations by other persons.

1.6 - Should changed conditions be alleged, Client agrees to notify AET before evidence of alleged change is no longer accessible for evaluation.

1.7 - AET reserves the right to charge for time to negotiate new terms and conditions from those portrayed in our proposal or should the Client require the use of their contract format. If mutually acceptable terms cannot be established, AET shall have the right to withdraw their proposal without any liability to the Client, Owner or other parties and assigns associated with the project. If Client requests use of their contract format after the services have already been authorized, AET will be compensated for services rendered prior to approval of the Client's contract by both parties according to the AET Terms and Conditions.

1.8 - The AET proposal accompanying these terms and conditions is valid for sixty (60) days after the proposal issuance date to the Client. If Client authorizes the services after the expiration date, AET reserves the right to review and revise the proposal as necessary.

SECTION 2 - SITE ACCESS AND RESTORATION

2.1 - Client will furnish AET safe and legal site access.

2.2 - Client accepts that in the normal course of field exploration work, certain types of damage to the site may occur which are inherent with this type of work, such as tire indentations to lawns and landscape areas. It is the responsibility of AET to take reasonable precautions to minimize such damage. It is also AET's responsibility to patch boreholes placed through pavement or slab areas after performance of borings. Otherwise, restoration of the site is the responsibility of the Client.

SECTION 3 - UNDERGROUND UTILITY AND STRUCTURE CLEARANCE

3.1 - It is necessary that borings, excavations and other penetrations be located such that they maintain a minimum safe distance from underground utilities or other man-made objects. Client shall advise AET of all utilities that service or are located on the site, as well as any underground improvements located on the site. AET will contact state notification centers, where available, or individual utility owners where a state notification center is not available prior to drilling. In an effort to conform to reasonable standards of care, AET is entitled to rely on the location information provided by locating vendors.

3.2 - Public utility owners may not provide the locating service on private property or the property owner may have private underground improvements which cannot be cleared through the state notification center or public utility owners. In such situations, the Client is responsible for location of such utilities prior to drilling, or for payment of a private utility clearance subcontractor.

3.3 - AET will not be responsible for any damages to "non-located" or incorrectly located underground utilities/improvements.

SECTION 4 - CONTAMINATION

4.1 - Client acknowledges and accepts that unavoidable contamination risks may be associated with AET's subsurface drilling, sampling and installation of monitoring devices. Risks include, but are not limited to, cross contamination created by linking contaminated zones to uncontaminated zones during the drilling process; containment and proper disposal of known or suspected hazardous materials, drill cuttings and drill fluids; and decontamination of equipment and disposal and replacement of contaminated consumables. Client and AET agree that the discovery of unanticipated actual or suspected hazardous materials may make it necessary for AET to take immediate measures, including regulatory notification, to protect human health and safety, and/or the environment. Client and AET also agree that the discovery of such materials constitutes a changed condition which may result in added costs to the Client, and may require a renegotiation of work scope or termination of services.

4.2 - Pursuant to risks set forth in Section 4.1, which are inherent with AET's work performed on the Client's behalf, Client agrees to hold harmless and indemnify AET from and against liability associated with contamination resulting therefrom.

SECTION 5 - SAFETY

5.1 - Client shall inform AET of any known or suspected hazardous materials or unsafe conditions at the site. If, during the course of AET's services, such materials or conditions are discovered, AET reserves the right to take measures to protect AET personnel and equipment or to immediately terminate services. Client shall be responsible for payment of such additional protection costs.

5.2 - AET shall only be responsible for safety of AET employees at the site. The Client or other persons shall be responsible for the safety of all other persons at the site.

SECTION 6 - SAMPLES

6.1 - Client is responsible for informing AET of any known or suspected hazardous materials prior to submittal to AET. All samples obtained by or submitted to AET remain the property of the Client during and after the services. Any known or suspected hazardous material samples will be returned to the Client at AET's discretion.

6.2 - Non-hazardous samples will be held for 30 days and then discarded unless, within 30 days of the report date, the Client provides a written request that AET store or ship the samples, at the Client's expense.

SECTION 7 - PROJECT RECORDS

The original project records prepared by AET will remain the property of AET. AET shall retain these original records for a period of three years following submission of the report, during which period the project records can be made available to Client at AET's office at reasonable times.

SECTION 8 - STANDARD OF CARE

AET performs its services consistent with the level of care and skill normally performed by other firms in the profession at the time of this service and in this geographic area, under similar budgetary constraints.

SECTION 9 - INSURANCE

AET maintains Worker's Compensation, Comprehensive General Liability, Automobile Liability and Professional Liability insurance, as described below. Upon request, prior to commencing the Services, AET can furnish Client with Certificates of Insurance evidencing that the insurance is in effect and in full force.

9.1 - Commercial General Liability insurance will include coverage for Products/Completed Operations (extending two (2) years after final acceptance of the Project by Owner or such longer period as the Contract Documents may require), Broad Form Property Damage including Completed Operations, Personal Injury, and Blanket Contractual Liability insurance applicable to AET's indemnity obligations under this Agreement.

9.2 - Automobile Liability insurance shall include coverage for all owned, hired and non-owned automobiles.

9.3 - Professional Liability Insurance is written on a claims-made basis and coverage will be maintained for two years after final acceptance of the Project by Owner or such longer period as the Contract Documents may require. Renewal policies during this period shall maintain the same retroactive date.

9.4 - AET can, if requested by Client and permitted by AET's insurer, endorse its Commercial General Liability (including Products/Completed Operations coverage) to add Client and/or Owner as an "additional insured" with respect to liability arising out of the Services performed for Client or Owner by AET. Such insurance afforded to Client and Owner as an additional insured under AET's policies shall be primary insurance and not excess over, or contributing with, any insurance purchased or maintained by Client or Owner.

9.5 - AET will maintain in effect all insurance coverage required by this Agreement at its sole expense, provided such insurance is reasonably available, and with insurance carriers licensed to do business in the state in which the Project is located and having a current A.M. Best rating of no less than A minus (A-).

9.6 - AET reserves the right to charge Client for additional coverage, coverage limits or policy modification including waiver of subrogation and other project specific requirements not known at the time of our proposal, subject to approval by AET's insurance providers.

SECTION 10 - DELAYS

If delays to AET's services are caused by Client or Owner, work of others, strikes, natural causes, weather, or other items beyond AET's control, a reasonable time extension for performance of work shall be granted, and AET shall receive an equitable fee adjustment.

SECTION 11 - PAYMENT, INTEREST, AND BREACH

11.1 - Invoices are due on receipt. Client will inform AET of invoice questions or disagreements within 15 days of invoice date; unless so informed, invoices are deemed correct. In any case, Client shall pay for services of AET within 30 days of invoice.

11.2 - Client agrees to pay interest on unpaid invoice balances at a rate of 1.5% per month, or the maximum allowed by law, whichever is less, beginning 30 days after invoice date.

11.3 - If any invoice remains unpaid for 60 days, such non-payment shall be a material breach of this agreement. As a result of such material breach, AET may, at its sole option, terminate all duties to the Client or other persons, without liability as well as withhold any and all data from Client until such invoice payments are restored to a current status.

11.4 - Client will pay all AET collection expenses and attorney fees relating to past due fees which the Client owes under this agreement.

SECTION 12 - MEDIATION

12.1 - Except for enforcement of AET's rights to payment for services rendered or to assert and/or enforce its lien rights, including without limitation assertion and enforcement of mechanic's lien rights and foreclosure of the same, Client and AET agree that any claim, dispute or other matter in question arising out of or related to this Agreement shall be subject to mediation as a condition precedent to arbitration or the institution of legal or equitable proceedings by either party; provided however that if either party should fail to respond to a request for mediation within 60 days after the request, this requirement for mediation as a condition precedent to arbitration or the institution of legal or equitable proceedings shall be of no force and effect.

12.2 - Unless Client and AET mutually agree otherwise, mediation shall be in accordance with the Construction Industry Mediation Rules of the American Arbitration Association. Request for mediation shall be in writing and the parties shall share the mediator's fee and any filing fees equally. The mediator shall be acceptable to both parties and shall have experience in commercial construction matters.

SECTION 13 - LITIGATION REIMBURSEMENT

Payment of AET costs for Client lawsuits against AET which are dismissed or are judged substantially in AET's favor will be the Client's responsibility. Applicable costs include, but are not limited to, attorney and expert witness fees, court costs, and AET costs.

SECTION 14 - MUTUAL INDEMNIFICATION

14.1 - AET agrees to indemnify Client from and against liability arising out of AET's negligent performance of the services, subject to Section 15 and any other limitations, other indemnifications or other provisions Client and AET have agreed to in writing.

14.2 - Client agrees to indemnify AET from and against liability arising from the negligent conduct of the Client, Owner, Client's Contractors/Subcontractors or other third parties, subject to any limitations, other indemnifications or other provisions Client and AET have agreed to in writing.

14.3 - If Client has indemnity agreement with other persons, the Client shall include AET as a beneficiary.

14.4 - AET's indemnification to the Client is limited solely to losses or damages caused by its failure to meet the standard of care and only to the extent of its negligence.

14.5 - AET will not accept any obligation to defend Client other than to meet the standard of care. If a court of competent jurisdiction rules that defense is implied or if required by law, AET's obligation for the costs of defense is only to the extent due to AET's negligent acts, errors or omissions.

SECTION 15 - LIMITATION OF LIABILITY

Client agrees to limit AET's liability to Client arising from AET's negligent acts, errors or omissions, such that the total liability of AET shall not exceed \$20,000.

SECTION 16 - UNIONIZATION

AET reserves the right to renegotiate an appropriate fee increase or to terminate its contract on three (3) days written notice to Client and will not accept any liability for any penalties or costs from Client, Owner and their successors, assignees, joint-venturers, Contractors and Subcontractors, or any other parties involved with the project for claims, liabilities, damages or consequential damages directly or indirectly related to AET being required to provide unionized personnel on the project. Reservation of this right on the part of AET represents neither approval nor disapproval of unions in general or the use of collective bargaining agreements.

SECTION 17 - POSTING OF NOTICES ON EMPLOYEE RIGHTS

Effective June 21, 2010, prime contracts with a value of \$100,000 or more and signed by federal contractors on projects with any agency of the United States government must comply with 29 CFR Part 471, which requires physical posting of a notice to employees of their rights under Federal labor laws. The required notice may be found at *29 Code of Federal Regulations Part 471, Appendix A to Subpart A*. The regulation also has a "flow-down" requirement for subcontractors under the prime agreement for subcontracts with a value of \$10,000 or more. AET requires strict compliance of its subcontractors working on federal contracts subject to this regulation. The regulation has specific requirements for location of posting and language(s) for the poster.

SECTION 18 - TERMINATION

After 7 days written notice, either party may elect to terminate work for justifiable reasons. In this event, the Client shall pay AET for all work performed, including demobilization and reporting costs to complete the file.

SECTION 19 - SEVERABILITY

Any provisions of this agreement later held to violate a law or regulation shall be deemed void, and all remaining provisions shall continue in force. However, Client and AET will in good faith attempt to replace an invalid or unenforceable provision with one that is valid and enforceable, and which comes as close as possible to expressing the intent of the original provision.

SECTION 20 - GOVERNING LAW

This Agreement shall be construed, and the rights of the parties shall be determined, in accordance with the Laws of the State of South Dakota.

SECTION 21 - ENTIRE AGREEMENT

This agreement, including attached appendices, is the entire agreement between AET and Client. Regardless of method of acceptance of AET's proposal and general conditions by the Client, this agreement nullifies any previous written or oral agreements, including purchase/work orders. Any modifications to this agreement must be mutually acceptable to both parties and accepted in writing. No considerations will be given to revisions to AET's general conditions or alternate contract format submitted by the Client as a condition for payment of AET's accrued services.

**EXHIBIT C
EFFECTIVE LABOR RATES**
