RE: Request Authorization to Seek Proposals for Engineering Services for
Rapid Valley Sanitary Sewer Bypass Project 13-2076 / CIP # 50911

This project is for the extension of a sanitary sewer main required to re-route the sanitary sewer flows that currently flow through the Rapid Valley Sanitary District to flow directly into Rapid City sewer mains. This project is needed because Rapid Valley is nearing the capacity of their sewer mains downstream of where City sewage flows into their system. The flows can be re-routed through the City trunk sewer on Elk Vale Road.

Staff proposes to hire a Consultant to design and bid the bypass sewer main and analyze all of the sewer flows that flow from the City through the Rapid Valley Sanitary District and determine the best way to eliminate City flows through the Rapid Valley system.

The project is funded from the Sewer Enterprise Fund. The project budget is \$355,000. Staff proposes to bid the project in 2013.

Dale Tech, PE
City Engineer

Cc: Terry Wolterstorff, Public Works Director
