Public Works Committee / Common Council

RE: Request Authorization to Seek Proposals for Engineering Services for
St. Andrew and St. Charles Sanitary Sewer & Water Extension & Reconstruction,
Project No. 14-2168 / CIP No. 50959

This project is for the construction and reconstruction of water and sanitary sewer main and appurtenance in portions of Saint Andrew Street and Saint Charles Street, between Mount Rushmore Road and 5th Street, and in 6th Street and 7th Street, between Saint Andrew Street and Franklin Street. An inlay, mill & overlay and patching are anticipated for the streets disturbed by utility work.

This project is being proposed to correct problematic water mains that have had multiple breaks and have exceeded the useful design life. Non-conforming water and sanitary sewer service lines will also be addressed.

Staff proposes hiring a consultant. The consultant will be responsible for the project design, acquiring easements, bidding the project, providing construction observation, administration and project closeout.

This project is expected to be funded from the Sewer Replacement / Improvement Fund, 0833; the Sewer Expansion Fund, 0834; the Water Replacement / Improvement Fund, 0933; and the Streets Fund, 8910. Based on the current information, the project cost is estimated to be \$1,766,000.00. Staff proposes to bid the project in 2014.

Dale Tech, PE
City Engineer
