### MEMORANDUM

TO: Public Works Director, Mayor, & City Council

FROM: David Van Cleave

DATE: 14 March, 2014

RE: Request from Mount Rushmore Wastewater Treatment Facility

I was recently contacted by AL Sage, Facilities Supervisor from Mount Rushmore. The Mount Rushmore wastewater facility will be conducting a project in September / October, to apply a protective coating to their clarifier. They are requesting to bring approximately 15,000 gallons per day of raw sewage to our treatment facility over a 15 day period.

My recommendation is to allow them to haul their waste to the Rapid City Water Reclamation Facility during that period. They would be charged according to the current holding tank waste fees, and any applicable laboratory fees. The daily quantity they would deliver is approximately 0.2% of our daily average flow and the plant has the available capacity.
