RE: Exception to Paragraph 7.40 of Section 7 – General Conditions of the City of Rapid City Standard Specifications

Ellsworth Air Force Base Water Meter Facility Relocation,
Project No. W11-1936

The Engineering Services Division requests authorization to revise Paragraph 7.40 of Section 7 – General Conditions of the City of Rapid City Standard Specifications for the Ellsworth Air Force Base Water Meter Facility Relocation, Project No. W11-1936. The revised specification will allow the Contractor to perform, with his own organization, work amounting to not less than thirty five (35) percent of the original total contract price instead of the standard fifty (50) percent. The project will require work from several trades and it may be difficult for a single contractor to conduct 50% of the work with their own forces. The City's project team believes it is in the best interest of the City to reduce the minimum percentage requirement from 50 percent to 35 percent for this project.
