Subject: Lacrosse street

This is written notice that we oppose the expansion of Lacrosse street across our property. Our septic field runs on the west side of our property between our house and property line. Putting the road across our property would wipe out our tree line that we put in to block wind and snow that it has taken us 25 yrs to grow along with taking out our septic field. This is the only flat level area on our property to be able to have septic field. There is plenty of open fields to move the road where it wouldn't affect a place that has been setup for over 25 yrs. We have been here longer than anyone to our west or any housing development.

We would like written response that you have received our notice.

Kip Harrington, Planner III

Division of Long Range Planning

Per our conversation today at the public hearing on October 8, 2015 of the proposed Comprehensive Plan Amendment for the extension of La Crosse St. which would be located directly east of our property, we would like to respond.

After much discussion with our family, our neighbors, and our attorney, we feel it would be detrimental to our quiet rural livelihood to build a second busy road such as the La Crosse St. extension so close to our property and that of all our neighbors. We already have a busy, noisy road known as West Nike Road, adjoining the west side of our property.

We **STRONGLY** object to the addition of a second busy road to be located on the east end of our property. This property is known as the Johnson Property. We would object to this addition now or at any time in the future regardless of the owner of the property. We feel this road extension is not necessary to service the current property landowners and that other options should be explored.

We, with the support of our neighbors, will not agree to ANY additional highway advancement in this area.
