

March 10, 2016

Here is some gang graffiti from Art Alley. As it is directed to you, I thought I would pass it on as you may not have seen it. It sounds pretty violent to me. If you think this is going to change, you either don't understand graffiti or are engaging in magical thinking.

My wife is in that alley every day (as are a lot of women). You played politics with her safety so the RCAC could pretend to take care of Art Alley. I'm disappointed in that. There is an awful lot of crime in the RC news these days, and probably more that doesn't get reported. Art Alley has so much more potential than to just become another casualty to the gentrification of downtown, and you let that slip right through your hands.

What are you going to use your position of power for, changing the status quo and really making things better, or forcing us to say that the meaningless adjustments you make in the status quo are victories?
