

# Slider windows: Open up and say ahh.

Sometimes the best air freshener is fresh air.

A strong and tough window can also be stylish and contemporary. For proof, simply take a look at the Visions 2000 Series slider windows. Available in both a traditional slider and a pocket slider, these windows open horizontally to allow fresh air and sunlight into any room while maintaining a streamlined appearance. And like all Visions windows, they are built to last. You get the best of both worlds: a sleek, contemporary window that won't crack under the pressure.

## EASE OF USE

**Surface-mounted fingertip releases** are side-mounted on the sash for easy access and automatically retract to produce an audible "click" when the sash is re-engaged.

A **track system** on sliders allows sash to slide smoothly for windows that are easy to open and close, year after year.

## WEATHER PROTECTION

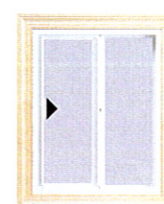

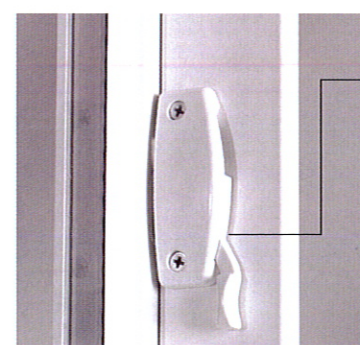

Visions 2000 single- and double-slider windows feature **pile weather stripping** with a mylar fin around the sash and an interlock system to seal out unwanted air and water.

## CLASSIC STYLING

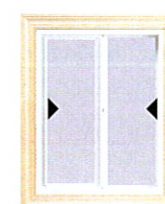

The sash design features **beveled sides**, a classic-styled beveled face, and no exposed fasteners.

Elegantly proportioned **checkrails** add classic looks and eliminate the need for finger routs.

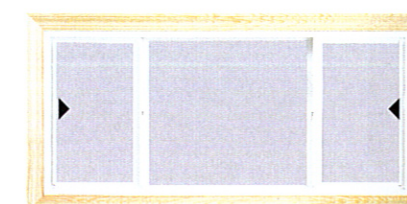

Low-profile, **surface-mounted sash locks** provide an uncluttered appearance.

Single Slider

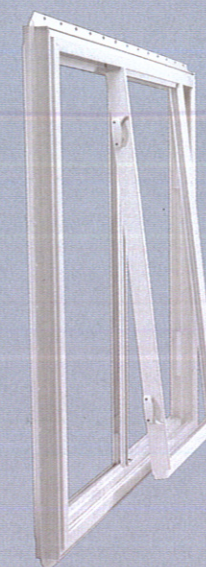

Double Slider

Triple Slider

Other styles and shapes available: Transom

Our pocket slider windows feature a sash that can be lifted up into the frame and then tilted out from the bottom of the window.
