

CANEXEL®

The Authentic

CANEXEL®  
PREFINISHED SIDING

A photograph of a two-story house with light-colored horizontal siding and white trim. The house features a second-story balcony with a white railing and a first-floor porch supported by white columns. The interior lights are on, and the scene is lit with the warm glow of dusk. The text "Here, it's CanExel®" is overlaid in white on a dark blue gradient background that covers the upper portion of the image.

Here, it's CanExel®

In the countryside or the suburbs. For protecting, enhancing and improving your home. For beauty, durability and peace of mind. For more than 30 years, people here have chosen CanExel® prefinished siding. The one. The only.

CanExel prefinished siding is a product of our forests, from which it draws its inspiration. It turns your house into a home — a place that is a reflection of you, that blends harmoniously with your environment and integrates with virtually every architectural style, from traditional to modern. Its essence: its authenticity, its ability to make your house unlike any other.

**A place you want to come home to.**

## CanExel® Authentic. Durable.

CanExel prefinished siding is produced from wood fiber, resin, and wax fused under pressure. This engineered wood siding is highly stable, as well as highly resistant to moisture. It also helps optimize our forests' yield by making the most of technological advances. In short, it does more with less...naturally. Moreover, CanExel siding is finished in the plant, resulting in durable, low maintenance products with all the beauty and nobility of wood.

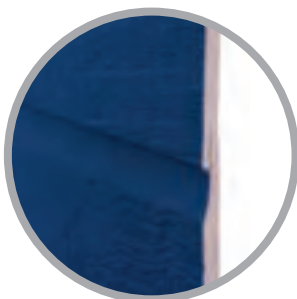

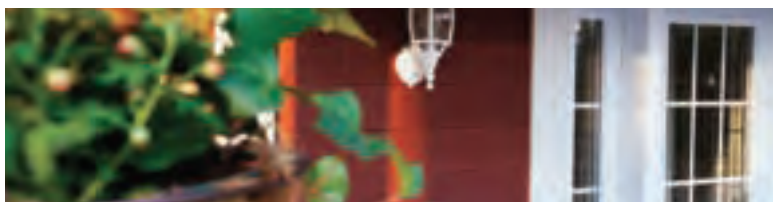

## CanExel® Ridgewood D-5™ Authenticity, European-style.

CanExel's Ridgewood D-5 lap siding has the authentic look and warm appeal of Dutch lap siding. Its 12-inch planks are distinguished by a central groove that gives the appearance of two 5-inch planks and shadow lines that accentuate the soft look conferred by the texture and color of the finishes.

- Deeply textured woodgrain appearance
- 17 colors
- Easy installation thanks to its self-aligning system
- Hidden nail assembly for a cleaner appearance
- Standard 12-foot planks (also available in 16-foot lengths for fewer seams)

## CanExel® Ced'R-Vue™ Authentic. Traditional.

CanExel's Ced'R-Vue lap siding delivers the authentic beauty and durability of cedar without any of the drawbacks. Planks are moulded in 6 or 9-inch widths creating the look of a traditional assembly. CanExel's Ced'R-Vue lap siding delivers the undeniable elegance of cedar along with its natural weather resistance, without the constant maintenance.

- Deeply textured woodgrain appearance
- 17 colors
- Easy installation thanks to its fastening-spline system
- Hidden nail assembly for a cleaner appearance
- Standard 12-foot planks (also available in 16-foot lengths for fewer seams)

## CanExel® Ultra Plank™ Classic authenticity

CanExel's Ultra Plank lap siding combines authenticity and style. This versatile product can be installed horizontally, vertically or diagonally. Its deeply grooved 12-inch wide planks create the effect of two 4 5/8-inch wide planks, for a traditional or contemporary look.

- Deeply textured woodgrain appearance
- 17 colors
- Easy installation thanks to its interlocking self-aligning system
- Hidden nail assembly for a cleaner appearance

## Authentic quality

CanExel siding products are subjected to a continuous quality control process, from forest to finish. Rigorous testing ensures that each product meets the highest standards of quality.

### **Advanced baked-on finish**

The finish on CanExel siding consists of five coats of baked-on paint, and a sealer providing increased resistance to cracking, splitting, warping, splintering and buckling of the substrate.

### **“7-climate” testing**

CanExel siding has been subjected to outdoor testing in seven different climates throughout North America. It has been shown to withstand the intense cold of the Canadian north to the tropical humidity of Florida, the scorching heat of the Arizona desert and the salty air of the Nova Scotia seacoast to the winds that sweep the Saskatchewan prairies.

### **UV resistance**

In every climate zone, CanExel siding is subjected to UV resistance tests using 45° tilt walls that triple the damaging effects of the sun to which 90° walls would normally be exposed. In every instance, CanExel products have withstood the most extreme conditions without damage to the substrate.

### **Limited 15/25-year warranty**

All CanExel siding products carry a limited 25-year warranty against cracking, deflection, and hail damage as well as a limited 15-year warranty on the finish. For further information, please refer to the full warranty.

These measures have made the CanExel brand the standard against which other products in its category are measured, making it the trusted solution for giving your home an authentic look that will withstand the test of time.
