

Angled Front View of Home

The homeowner hasn't decided if they'd like the skylight (inside the circle) removed on the upper south facing slope. I doubt this opening existed during the historical period we are preserving so I can't imagine that this request would get denied either way. Therefore, I am asking that the committee approve it either way so they have time to decide, but we still get our approval to proceed with the roofing.

Front View of Home

No issues here. You can see that the insurance adjuster has marked the roof. There are a number of hail strikes in the roof, which makes it necessary to replace. It isn't leaking yet, but who knows how long it will stay that way.

Side View of Home - taken from Franklin Street

Another skylight that will more than likely be eliminated. By the same token, I'd like it if the committee can approve this project to proceed and give the homeowner the option of either replacing them with new, reusing the existing skylights, or removing them and patching in the holes. Thank you!

Shed in back yard - taken from
Franklin Street

We would like to replace the
roofing on the shed to match the
house and garage.

This is a sample of the shingle the home-owners have selected.
