Murphy Addition- Reconstruction

Description of Request

The owners of the property would like to demolish the addition on the rear of their home. The addition, once demolished, will be replaced by an addition of similar width but deeper in depth, with a pitched roof. This larger addition will be the main family/living room area of the home. The window configuration will be different than the original to better suit the owner's needs. The finish floor elevation of the addition will also be matched to the existing house, providing a seamless transition from the house to the addition.
