### 3. SOFTWARE UPDATES

- 3.1 **Software Updates.** SunGard shall provide to the Customer Software Updates for UNIX/MPE server based Software via Hassle Free Support™ (HFS). HFS means that SunGard will log-on to Customer's designated UNIX/MPE server, with authorization from Customer, and load the UNIX/MPE server-based Software Update into a single Account for the Customer. HFS is strictly Internet delivered. Therefore, the exchange of magnetic/optical media for UNIX/MPE server-based Software Updates is not available. If SunGard, in its sole discretion, determines that delivery of the UNIX/MPE server based Software Update via Internet is not practical, then Customer will receive magnetic/optical media along with instructions on assisting SunGard in applying the UNIX/MPE server based Software Update. For Software Updates for Windows™ based Software, media will be sent to Customer, including Customer loading instructions. Software Updates shall be accompanied by updates to the Documentation on optical media whenever SunGard determines, in its sole discretion, that such updates are necessary. Customer agrees to accept Software Updates as they become available and to remain current on the Latest Software Update. In addition, between Software Updates, service packs may be available for Customer download and installation. For those Customer's that choose not to utilize the HFS method of Software Update delivery; the Software Updates are available for download by the Customer from SunGard's FTP site.
- 3.2 From time to time new optional features may be added to the Software as a result of a Software Update. Optional features may require the use of third party software or hardware. Customer shall have the option to procure or not to procure such third party products to enable such optional features.
- 3.3 The Customer agrees to maintain, for the duration of this Agreement, an Internet connection (consisting of FTP and TELNET allowing SunGard access to Customer's server system) to facilitate Software Updates and remote support of the UNIX/MPE server based Software and to maintain remote control software (as specified by SunGard) to support the Windows™ based Software. Security will be based upon SunGard's unique IP address. If, after a good faith effort, Customer cannot maintain an Internet connection, then SunGard will provide Software Updates to Customer on magnetic/optical media. Customer agrees to maintain at least a 33600 baud modem connection and to make available competent personnel to assist SunGard in transferring the Software Updates to the server. Customer assistance may be required during non-standard work hours, such as evenings, weekends and/or holidays. A nominal handling charge will apply to cover the cost of the media and shipping charges.
- 3.4 SunGard shall provide Customer with Software Updates to maintain the compatibility of the Software with new releases of the operating system under which the Software is licensed.
- 3.5 Any modifications not made by SunGard, and the results caused thereby to the Software shall be the sole responsibility of the Customer.
- 3.6 SunGard will use commercially reasonable efforts to provide Software Updates to cause the Software to continue to conform to GASB and GAAP requirements, and to maintain accurate Federal and State payroll tax tables (as published by the taxing authorities) and their related calculation processes. In the event that original programming is required to meet any other mandated Software change (including State, Federal, or Local mandated changes), the development costs will be borne by all Customers who utilize that Software change.
