

We have also put a lot of thought towards expansion of these kits, so that if you decide to purchase a small kit, you can then later add more as you desire. For example, today you purchase a 4-foot mini half-pipe, 8-foot wide, and later decide you want a 12-foot wide ramp. Just purchase a 4-foot extension kit, and there you have it! We go even further, in that if you want to add a 6-foot extension to your new 12-foot wide ramp, just add that kit and you're done! The combination possibilities are endless.

- 1. 4Ft./1.1m Quarterpipe With 6Ft./1.8 Ext.
- 2. Launch Ramp Fly Box
- 3. Flat Bank Channel
- 4. Spine Combination
- 5. Street Spine With Fly Wedge Spine

MPKIT COMBINATION EXAMPLES

TECHNICAL INFORMATION

All RampKits are available in either four or eight foot sections, and each kit contains an instruction manual and all materials. For the specialty client we are also proud to offer our 6-foot Mobile halfpipe, for all those demo's, rental's, and brand promotional events requiring fast and easy set up. A full size 6-foot halfpipe is integrally built on a 17-foot trailer which sets up in 30 minutes, with the option of a complete street course solution that fits inside!
