**No. 01TI001 - Resolution Creating Tax Increment District #31**

**ITEM 74**

---

The purpose of this Tax Increment District is to fund drainage improvements in the Race Track Drainage Basin. Previously, Pennington County formed a Tax Increment District to fund improvements to build several detention cells. The applicant is now requesting approval of a Tax Increment District to fund the construction of a storm drainage pipe and related improvements to transport the storm drainage from one of the detention cells constructed with funding from the County Tax Increment District. The storm drainage pipe is located outside the previously created County Tax Increment District and is located within the City limits. As a result, the cost of the pipe improvements can not be paid for from revenues from the County Tax Increment District. The estimated cost of the construction of the storm drainage pipe is \$250,000.

Additionally, funding is being requested in the amount of \$250,000 for the construction of an additional detention cell, located upstream in the drainage basin on the west side of Elk Vale Road. While there are no specific development plans currently under consideration for that property, the improvements could be constructed at anytime within the five years following the adoption of the Tax Increment District.

Mr. Estes has proposed to obtain private financing for the project costs. He would be reimbursed from any tax increment revenues. The City will only be responsible for passing on any revenues received.

The initial application included an area closely following the drainage basin boundaries; however, state statute precludes the inclusion of only a portion of a property in the district. For this reason, the proposed boundaries of the district have been expanded to include entire parcels.

**STAFF REVIEW:** Pursuant to the adopted Tax Increment Policy, the Tax Increment Financing Review Committee met with the applicant and reviewed their request for the creation of a Tax Increment District. The Review Committee found that the proposed project complied with all applicable statutory requirements as well as the City's adopted Tax Increment Policy. Specifically, the Committee found that in addition to the mandatory criteria, the proposal met the following two optional criteria:

- Criteria #2 – The project will eliminate an actual or potential hazard to the public; and,
- Criteria #4 – The project will bring new or expanded employment opportunities.

Copies of the adopted Tax Increment Financing Policy are attached for your reference.

Based on the Tax Increment Financing Review Committee's recommendation, staff recommends approval of the attached resolution approving the creation of Tax Increment District Number Thirty-one.
