REPORT BY	Lisa Seaman

RECOMMENDATION:

Staff recommends that the Preliminary and Final Plat be continued to the April 4, 2002 Planning Commission meeting to allow the applicant time to submit additional required information.

GENERAL COMMENTS: **This item was continued from the March 7, 2002 Planning Commission meeting. (Updates to the staff report are shown in bold.)** This Preliminary

STAFF REPORT

March 21, 2002

No. 02PL009 - Preliminary and Final Plat

ITEM 6

and Final Plat request has been submitted to revise the common lot line between existing Lot 16P and Lot 17P of Chapel Lane Village Subdivision. The plat proposes to reconfigure the existing lot lines by moving the east property line of Lot 16P south so that a triangular piece of Lot 17P will be replatted into Lot 16P. The owner of Lot 16P has utilized the triangular area to the east of his residence as a side yard, and until recently believed that the triangular area was a part of his lot.

Lots 16P and 17P of Chapel Lane Village were platted and building permits issued for the existing residences by Pennington County. On April 4, 1978 the City of Rapid City annexed the Chapel Lane Village and Chapel Valley Subdivision.

STAFF REVIEW: Staff has reviewed the proposed plat and noted the following considerations:

Site Plan: The site plan submitted with the Preliminary and Final Plat request included the property boundaries and existing building locations. The Engineering Division Staff has noted that existing utilities may currently be located within the existing side yard minor drainage and utility easements between Lots 16P and 17P. Therefore, staff is requesting that the site plan be revised to identify the location of all utilities, both private and public, on or adjacent to Lots 16P and 17P to determine if easements need to be retained for any existing utilities. In addition, the site plan should include all public improvements (i.e. existing street) adjacent to the property. **To date, the requested site plan has not been submitted for staff review.**

Lot Size: The Rapid City Municipal Code requires a minimum lot size of 6,500 square feet for a lot located within the Low Density Residential Zoning District. The plat submitted with this request identifies that Lot 17P Revised will be 6,133 square feet while Lot 16P Revised will have 8,882 square feet. Staff is recommending that the plat be revised to increase the size of Lot 17P Revised to a minimum of 6,500 square feet. **To date, a revised plat has not been submitted.**

Plat Title: The Register of Deeds has noted that the original plat of the subject property identified the subdivision name as "Chapel Lane Village" rather than "Chapel Lane Village Subdivision" as shown on the proposed plat. The Register of Deeds has requested that the word subdivision be removed from the title of the proposed plat so that the new plat accurately reflects the original subdivision name.

Road Improvements: The platting of this property triggers the requirement to improve that portion of Kirkwood Drive that abuts the subject property. According to the City's Street Design Criteria Manual, this would necessitate the installation of curb and gutter, sidewalks and street lights on Kirkwood Drive. The petitioner has applied for a Subdivision Variance request to waive all such improvements (see related Subdivision Variance request #02SV007). City Staff is supportive of waiving all road improvement requirements because the proposed plat does not increase the density of the subdivision. This is consistent with the practice of the Planning Commission and City Council.
