**No. 03PD049 - Planned Development Designation**

**ITEM 25**

---

Highway 16. The subject property is currently in a No Use Zoning District. Property located south of the subject property is zoned Low Density Residential District with a Planned Residential Designation. Property located east of the subject property is zoned Limited Agriculture District by Pennington County. The properties located north and west of the subject property are zoned No Use District. The South Robbinsdale Neighborhood Area Future Land Use Plan indicates the land use on the subject property is appropriate for Planned Residential Development with a maximum density of one dwelling unit per acre. The land use for the property located south and west of the subject property is Planned Residential Development with a maximum density of one dwelling unit per acre. The land use for the property located north of the subject property is Planned Residential Development with a maximum density of one dwelling unit per acre and Planned Unit Development.

STAFF REVIEW: According to the Rapid City Zoning Ordinance, a Planned Development Designation is a procedure by which property can be officially designated as a future Planned Residential Development, Planned Unit Development, Planned Commercial Development, or Planned Light Industrial Development prior to approval of an Initial or Final Development Plan. One of the factors established by the Ordinance in determining whether a property should be a Planned Development Designation is – *“When the location of the property is such that its development may have unusually significant impacts upon public infrastructure or surrounding developed areas.”*

The South Robbinsdale Neighborhood Area Future Land Use Plan identifies the land use for the subject property as appropriate for Planned Residential Development with a Maximum Density of one dwelling unit per acre. The applicant met with the Future Land Use Committee to discuss changing the land use from Planned Residential Development with a maximum density of one dwelling unit per acre to Planned Residential Development with a maximum density of 2.5 dwelling units per acre with a Planned Development Designation and changing the zoning from No Use District to Low Density Residential District with a Planned Development Designation. The Future Land Use Committee noted that Low Density Residential District with a Planned Development Designation was appropriate for the subject property which was located adjacent to residential land use(s) to the north, east and south. The Future Land Use Committee recommended the requested changes in land use and rezoning of the subject property.

Staff has reviewed the application and notes that when development occurs, the right-of-way identified will need to be increased to 76 feet to comply with the collector status as identified on the Municipal Street Plan.

As of this writing, the sign has been posted on the property, and the receipts from the certified mailing have been returned. Staff has received three inquiries regarding this request.
