

Information for Rezoning and Use on Review Application

August 25, 2005

Due to a continued increased need for secure detention housing, the Pennington County Work Release Facility located at 703 Adams Street will be modified to accommodate secure housing for approximately 40 medium security inmates. The modification to the building will all occur inside the facility. The medium security inmates will be supervised by a correctional officer assigned to that task. The current outside fenced yard on the east side of the building will be utilized as outdoor recreation for the inmates. A correctional officer will be assigned to the yard while medium security inmates are placed in the outside yard. The change in use of this facility will result in one additional staff on site.
