**ITEM 27**

GENERAL COMMENTS: This undeveloped property contains approximately 33.94 acres and is located south of Interstate 90 and east of Elk Vale Road. The subject property was annexed into the City effective July 22, 2003 and placed in a No Use Zoning District. The properties located north and west of the subject property are zoned No Use District. The properties located south and east of the subject property are zoned Medium Density Residential District with a Planned Residential Development.

STAFF REVIEW: The adopted Comprehensive Plan is a framework within which development and rezoning proposals are measured and evaluated. The plan is intended to guide the orderly growth of the community. In order for the plans to remain viable and to keep pace with a changing market place, periodic adjustments to reflect changing conditions will be required.

Staff has reviewed this proposed Comprehensive Plan Amendment for conformance with the six criteria for review of Comprehensive Plan Amendments established in Section 2.60.160(D). A summary of Staff findings are outlined below:

1. *Whether the proposed change is consistent with the policies and overall intent of the comprehensive plan.*

One of the goals of any Future Land Use Plan is to encourage compact and contiguous growth along the City's fringe that is linked to both the levels of demand in the market and to the orderly extension and efficient use of public improvements, infrastructure, and services. The objective is to encourage in-fill and full utilization of properties and avoid scattered or strip residential, commercial and industrial development outside the urban areas. The subject property, as well as the surrounding property, is undeveloped. Future development of the area for residential and commercial use is anticipated. Water and sewer are in the area and will be extended to the subject property as development occurs. Elk Vale Road, a principal arterial road, is located adjacent and west of the subject property. A public school and residential properties are located south and east of the subject property. Property located north of the subject property is proposed to be rezoned to Low Density Residential District. The Office Commercial Zoning District will provide a transition and buffer between more intense general commercial uses to the south and west and residential uses to the north. The proposed change appears to be consistent with the intent of the comprehensive plan.

2. *Whether the proposed change is warranted by changed conditions within the neighborhood surrounding and including the subject property.*

The subject property was annexed into the City limits in July 2003. The Future Land Use Committee has met with the property owners several times to review this area as it relates to the Elk Vale Neighborhood Future Land Use Plan and recommends approval of the change

in use from Medium Density Residential with a Planned Residential Development to Office Commercial with a Planned Commercial Development. The undeveloped property is located within an area that is in the process of development into residential and commercial uses. Water and sewer are in the area and will be extended as development occurs. The applicant has included a request to rezone the subject property from No Use District to Office Commercial District (05RZ068).

3. *Whether and the extent to which the proposed amendment is compatible with existing and proposed uses surrounding the subject land*

The properties located north and west of the subject property are currently zoned No Use District. The properties located south and east of the subject property are currently zoned Medium Density Residential District with a Planned Residential Development. The subject property is located east of Elk Vale Road, a principal arterial road. The surrounding property is proposed to be zoned Low Density Residential District with a Planned Residential Development and General Commercial District with a Planned Commercial Development. Zoning the property with a Planned Commercial Development will provide a mechanism to address any mitigating issues that may develop with the lesser residential land uses and the commercial land uses surrounding the property.

4. *Whether and the extent to which the proposed amendment would adversely effect the environment, services, facilities, and transportation*

The subject property is adjacent to and has access to Elk Vale Road, a principal arterial street. City water and sewer will be extended to the property as development occurs. The proposed Office Commercial land use with a Planned Commercial Development would not have a significant adverse effect on the environment or services in the area.

5. *Whether and the extent to which the proposed amendment would result in a logical and orderly development pattern.*

The subject property is located in an area that is developing as residential and commercial uses. With the availability of water, sewer and street connections to the subject property, the proposed amendment will allow the continuation of infill development of this area. Office Commercial land use as a transition and buffer between more intense general commercial uses to the south and west and residential uses to the north appears to be an orderly development pattern and an appropriate land use for the subject property.

6. *Whether and the extent to which the proposed amendment adversely affects any other part of the city, or creates any direct or indirect adverse effects.*

The infrastructure is in close proximity to the subject property and residential and commercial development is currently established in the area. Staff has not identified any

significant adverse effects that the Comprehensive Plan Amendment would have on the surrounding area or on the City.

As of this writing, the required sign has been posted on the property but the receipts from the certified mailing have not been returned. Staff will notify the Planning Commission at the January 26, 2006 Planning Commission meeting if this requirement has not been met. Staff has received no inquiries or objections regarding the proposed amendment at the time of this writing.

Staff recommends that the Amendment to the Comprehensive Plan to change the land use from Medium Density Residential with a Planned Residential Development to Office Commercial with a Planned Commercial Development be approved.
