**ITEM 27**

Code be continued to the February 23, 2006 Planning Commission meeting at the applicant's request.

**GENERAL COMMENTS:**

The applicant has submitted a Variance to the Subdivision Regulations to waive the requirement to install sidewalk along both sides of the proposed commercial street, to waive the requirement to install curb, gutter, sidewalk, street light conduit, water, sewer and pavement along an existing 60 foot wide road easement; and, to waive the requirement to install curb, gutter sidewalk street light conduit, water, sewer and to reduce the pavement width from 24 feet to 20 feet and to reduce the right-of-way width from 49 feet to 20 feet for a proposed 20 foot wide pedestrian and service easement. In addition, the applicant has submitted a Layout Plat to subdivide the subject property into three lots to be known as The Village at Founders Park. The applicant has also submitted a Comprehensive Plan Amendment to the Major Street Plan to eliminate West Street as a collector street. In addition, the applicant has submitted a Vacation of Right-of-Way request to vacate West Street as it abuts the subject property. The applicant has also submitted an Initial Planned Residential Development to allow a mix of multi-family units and office use to be constructed on the subject property. (See companion items #06PL001, 06CA001, 06VR001 and 06PD001.)

The property is located at the western terminus of W. Chicago Street and is currently void of any structural development.

**STAFF REVIEW:**

Staff has reviewed the Variance to the Subdivision Regulations and has noted the following considerations:

**Easements:** The Layout Plat identifies an existing 60 foot wide road easement located along the north lot line and a portion of the west lot line of the subject property. The easement serves as access to an adjacent property located west of the subject property. The easement is classified as a lane place street requiring that it be constructed with a minimum 24 foot wide paved surface, curb, gutter, sidewalk, street light conduit, water and sewer. In addition, the Layout Plat identifies a proposed 20 foot wide private pedestrian and service easement extending south from W. Chicago Street across City park property and through the southeast corner of the subject property to serve as access to properties located south and west of the subject property. The easement is also classified as a lane place street requiring that it be located in a minimum 49 foot wide easement and/or right-of-way and constructed with a minimum 24 foot wide paved surface, curb, gutter, sidewalk, street light conduit, water and sewer. However, since a portion of the street is located on City park property, the Parks and Recreations Department must review and approve that portion of the street proposed to be located through the adjacent City Park. The City Council must also review and approve the use of the City property for the location of a street. In addition,

**No. 06SV001 - Variance to the Subdivision Regulations to waive the requirement to install curb, gutter, sidewalk, street light conduit, water, sewer and pavement, and to dedicate additional Right-of-Way along the access easements and to waive the requirement to install sidewalk along both sides of the internal streets as per Chapter 16.16 of the Rapid City Municipal Code**

**ITEM 27**

a SDCL 11-6-19 Review must be submitted for review and approval for the construction of the street on public property. To date, the City Parks and Recreations Department and the City Council have not reviewed and approved the location of a street across public property as identified above. Staff can not support the Variance to the Subdivision Regulations to waive the improvements along the northern 60 foot wide road easement unless the City approves the alternate street location across City park property. This issue must be addressed prior to Planning Commission approval of the Variance to the Subdivision Regulations request.

Sidewalk: The applicant has submitted a Variance to the Subdivision Regulations to waive the requirement to install sidewalk along both sides of the commercial street. In particular, the applicant has indicated that a sidewalk will be constructed along one side of the commercial street. In addition, the applicant has submitted an Exception to the Street Design Criteria Manual to allow a five foot wide curb side sidewalk in lieu of a four foot wide property line sidewalk. Staff has reviewed the request and noted that as a part of the associated Initial Planned Unit Development, meandering pedestrian walkways through the development are being proposed. In addition, staff has noted that a sidewalk along one side of the street will provide pedestrian access along the street section. As such, staff is recommending that the Variance to the Subdivision Regulations to waive the requirement to install sidewalk along both sides of the street be approved with the stipulation that a sidewalk be constructed along one side of the street.

The applicant has also submitted topographic information identifying physical constraints limiting the location of sidewalks along the proposed commercial street. As such, staff is recommending that the Exception to the Street Design Criteria Manual to allow a five foot wide curb side sidewalk in lieu of a four foot wide property line sidewalk be approved.

Legal Notification Requirement: The receipts from the certified mailings have not been returned. Staff will notify the Planning Commission at the February 9, 2006 Planning Commission meeting if this requirement is not met. Staff has not received any calls or inquires regarding this proposal.

On February 2, 2006, the applicant requested that this item be continued to the February 23, 2006 Planning Commission meeting. As such, staff is recommending that the Variance to the Subdivision Regulations be continued to the February 23, 2006 Planning Commission meeting as requested.
