NOTES:

1. All major drainage easements shown hereon shall be kept free of all obstructions including but not limited to buildings, walls, fences, hedges, trees and shrubs. These easements grant to all public authorities the right to construct, operate, maintain, inspect and repair such improvements and structures as it deems expedient to facilitate drainage from any source.
2. Building setback requirements are as stated in the zoning and/or platting regulations.
3. Utility and Minor Drainage Easements - If on the interior side of all front, side and rear lot lines, except on the common lot line of townhouse lots designated by A or B following the lot number.
4. Lots designated by A or B following the lot number are reserved for development as townhouse lots in accordance with zoning regulations. There is no side yard setback requirement for the common interior lot line of townhouse lots.
5. Total right-of-way dedicated by this plat 0.86 acres.
6. Basis of Bearing: N 89°09'30" E for the South line of the NW 1/4 SW 1/4 of Section 26.
7. Pursuant to SDCL 3-3-6.1 and 3-3-2, The Developer of the property described within this Plat shall be responsible for protecting any waters of the State, including groundwater, located adjacent to or within such platted area from pollution from sewage from such subdivision and shall in prosecution of such protection conform to and follow all regulations of the state of South Dakota Department of Environment and Natural Resources relating to the same.
8. A 6' interior maintenance easement exists on each side of the common lot line between townhouse lots to provide adequate room for maintenance, repair and alterations.
9. A 24' side by 25' deep common access easement exists 12' on each side of the common lot line of townhouse lots.

PUBLIC ACCESS EASEMENT

STATE OF SOUTH DAKOTA)
) SS.
COUNTY OF PENNINGTON)

Harmony Heights Associates, LLP (Grantors), Owners of the hereinafter described real property, hereinafter referred to as grantors, for and in consideration of One Dollar (\$1) and other good and valuable consideration, receipt of which is hereby acknowledged, hereby grants, conveys, bargains and warrants unto the City of Rapid City, South Dakota and its successors and assigns, Grantee, of Rapid City, South Dakota, a public access easement through, under, over and across the following described real property and shown on attached Exhibit A:

Tract B of Fountain View Subdivision in the W ½ NW ¼ SW ¼ Section 26, T2N, R7E,
BHM, Rapid City, Pennington County, South Dakota.

A public access easement shall include the right to enter upon the easement property to construct, install, operate, inspect, maintain, and repair access upon said property. The easement is intended to be used for public access. The agreement shall run with the land and be binding upon and inure to the benefit of the parties, their heirs, successors, administrators, executors, and assigns.

NOTES

1. All major drainage easements shown herein shall be kept free of all obstructions including but not limited to buildings, walls, fences, hedges, trees and shrubs. These easements grant to the authorities the right to construct, operate, maintain, inspect and repair such improvements and structures as it deems expedient to facilitate drainage from any source.
2. Building Setback requirements are as stated in the zoning and/or platting regulations.
3. Utility and Minor Drainage Easements - 2' on the interior side of all front, side and rear lot lines, except on the common lot line of townhouse lots designated by A or B following the lot number.
4. Lots designated by A or B following the lot number are reserved for development as townhouse lots in accordance with zoning regulations. There is no side yard setback requirement for the common interior lot line of townhouse lots.
5. Total right-of-way deduced by this plat: 0.86 acres.
6. Basis of Bearing: N 89°02'30" E for the South line of the NW 1/4 SW 1/4 of Section 26.
7. Pursuant to SDCL 3-3-2.1 and 3-3-2, The Developer of the property described within this Plat shall be responsible for protecting any voters of the State, including groundwater, located adjacent to or within such platted area from pollution from sewage from such subdivision and shall in prosecution of such protection conform to and follow all regulations of the state of South Dakota Department of Environment and Natural Resources relating to the same.
8. A 6' exterior maintenance easement exists on each side of the common lot line between townhouse lots to provide adequate room for maintenance, repair and alterations.
9. A 24' wide by 25' deep common access easement exists 12' on each side of the common lot line of townhouse lots.

Re: Derby Lane Layout Plat

Dear Travis:

I would like to provide some additional information regarding the Derby Lane Layout Plat. We have met with you on two occasions and I believe we have found a solution that is acceptable to everyone.

My client wishes to locate 2-4 plexes on the site. He prefers not to go to a more dense development. The property zoning will currently allow for a much more dense development but that is not what my client wants to develop.

My client has discussed purchasing additional property for proposed Tract 2 as well as securing the drainage easement from the adjacent property. This is the only feasible option for drainage, due to topography, the current site runoff flows across the adjacent lot and the adjacent site (west) is not feasible for development. A drainage easement probably should have been required when Lot B3 was platted, however, my client is willing to acquire the necessary easement.

The shared access was approved when Lot B3 was platted. My client will secure additional easement on that access to bring it into compliance with today's criteria for a lane/place without on-street parking. We have provided for additional off-street parking on Tract 2.

By acquiring additional property for Tract 2, the proposed layout eliminates any setback variance. The only variances we are asking for is for sewer, water, street light conduit and sidewalks (on the north side only) for the shared access. The shared access will only serve as access for 2 parcels. Water and sewer are available from Derby Lane. Any

water and sewer improvements on the access would only serve 1 parcel (proposed Tract 2) with no possibility of being extended therefore it seems unnecessary and a large expense to require these improvements on the shared access.

Derby Lane has street lighting, Somerset Court has lighting and my client is planning for interior site lighting. My client is planning to install sidewalks along the south side of the shared access and along Derby Lane. He is requesting a variance only for sidewalk on the north side of the shared access (adjacent property).

We believe that the proposed layout provides a reasonable solution to developing the site in a manner that is consistent with surrounding uses and we would ask you to support the requested variance.

If I can provide any additional information, please contact my office at 605-718-8825.

Sincerely,

Advanced Engineering & Surveying, LLC

Re: Derby Lane Layout Plat

Dear Travis:

I would like to provide some additional information regarding the Derby Lane Layout Plat. We have met with you on two occasions and I believe we have found a solution that is acceptable to everyone.

My client wishes to locate 2-4 plexes on the site. He prefers not to go to a more dense development. The property zoning will currently allow for a much more dense development but that is not what my client wants to develop.

My client has discussed purchasing additional property for proposed Tract 2 as well as securing the drainage easement from the adjacent property. This is the only feasible option for drainage, due to topography, the current site runoff flows across the adjacent lot and the adjacent site (west) is not feasible for development. A drainage easement probably should have been required when Lot B3 was platted, however, my client is willing to acquire the necessary easement.

The shared access was approved when Lot B3 was platted. My client will secure additional easement on that access to bring it into compliance with today's criteria for a lane/place without on-street parking. We have provided for additional off-street parking on Tract 2.

By acquiring additional property for Tract 2, the proposed layout eliminates any setback variance. The only variances we are asking for is for sewer, water, street light conduit and sidewalks (on the north side only) for the shared access. The shared access will only serve as access for 2 parcels. Water and sewer are available from Derby Lane. Any

water and sewer improvements on the access would only serve 1 parcel (proposed Tract 2) with no possibility of being extended therefore it seems unnecessary and a large expense to require these improvements on the shared access.

Derby Lane has street lighting, Somerset Court has lighting and my client is planning for interior site lighting. My client is planning to install sidewalks along the south side of the shared access and along Derby Lane. He is requesting a variance only for sidewalk on the north side of the shared access (adjacent property).

We believe that the proposed layout provides a reasonable solution to developing the site in a manner that is consistent with surrounding uses and we would ask you to support the requested variance.

If I can provide any additional information, please contact my office at 605-718-8825.

Sincerely,

Advanced Engineering & Surveying, LLC
