RE: 11-6-19 Review for bike path north of
State Contract P-PH 0044(31)43, PCN 5617
Reconstruction of Mt. View Drive

DESCRIPTION OF REQUEST:

The South Dakota Department of Transportation has incorporated bicycle lanes and sidewalk into its plans for reconstruction of Mountain View Road/State Highway 44. Pending approval from the City of Rapid City, approximately 210 feet of 8' wide sidewalk will be constructed to connect the pedestrian/bike facilities to the City-owned bike path. The connection would be made between the northeast corner of the Mountain View Road/Omaha Street intersection and the bike patch 210 feet north of there. At this time, the SDDOT is not certain about the type of material that will be used to construct the bike path, PCC or Asphalt concrete, as we are aware of potential development plans for a road extending north from this intersection.

The DOT will pay the approximate \$7000 to construct the bike path.
