RE: Marshall Heights Sanitary Sewer and Force Main
CC: Rapid City Implement

Message: (Ref. 00-375)

The attached plans are an update of a previous submittal. The current submittal is to occupy I-90 ROW to test the existing force main and extend it as shown on the plans. Additional work includes re-shaping an existing drainage shale into the I-90 ROW from ~ plans station 2+00. The proposed lift station is not part of this phase.

A Utility Permit Application has been submitted to SDDOT for their approval.

CETEC has given CENTERLINE their consent to coordinate this work, therefore the original plans prepared by CETEC are submitted with CENTERLINE revisions as appropriate.

Please call with questions. Thanks.
