No. 07SR049 - SDCL 11-6-19 Review to allow pavement of a parking lot on public property, and to allow pavement of a portion of public alley

ITEM 13

Boulevard North adjacent to the Executive Golf Course. A structure known as the "Friendship House" is currently located on the property. The property is currently zoned Medium Density Residential.

South Dakota Codified Law 11-6-19 states:...whenever any such municipal council shall have adopted the comprehensive plan of the municipality or any part thereof, then and thenceforth, no street, park, or other public way, ground, place, space, no public building or structure, no public utility, whether publicly or privately owned, if covered by the comprehensive plan or any adopted part thereof, shall be constructed or authorized in the municipality or within its subdivision jurisdiction as defined in § 11- 6-26, until and unless the location and extent thereof shall have been submitted to and approved by the Planning Commission".

STAFF REVIEW:

Staff has reviewed the applicant's SDCL 11-6-19 request and noted the following considerations:

SITE PAVING:

The parking lot on the property as well as the abutting alley currently have gravel surfacing. As noted the applicant is requesting to pave the parking lot and the portion of the alley that abuts the property. Staff has noted that the entrance from the alley into the parking lot is severely eroded. Staff recommends that this entrance be adequately graded or repaired prior to approval by Planning Commission. The applicant has not provided grading plans or other data demonstrating that storm water can be adequately drained from the site once paving has taken place. Staff recommends that the applicant submit additional grading and drainage information for review and approval prior to approval by Planning Commission.

ACCESS:

Currently the property is accessed by two approaches off of West Boulevard North. These approaches are currently 85 feet in apart. Staff has noted that these approaches do not meet the minimum spacing requirement of 150 feet for a collector street as per the Street Design Criteria Manual. Staff recommends that the approach located on the northern boundary of the property be closed. Staff finds that this would eliminate the inadequate spacing between approaches, and provide additional space for parking and landscaping. The site has an alternative means of access from the alley that abuts on the western boundary.

FLOOD PLAIN:

Staff has noted that the southwestern portion of the property is located within the federally designated 100 year flood plain. Staff recommends that prior to approval of the SDCL 11-6- 19 request that the applicant obtain a flood plain development permit.

Staff recommends that this item be continued to the November 8, 2007 Planning Commission meeting to allow the applicant time to submit additional information and to obtain a flood plain development permit.
