No. 08SR035 - SDCL 11-6-19 Review to allow the extension of a public water main **ITEM 50**

water main. The property is located at 5406 Old Folsom Road, which is east of South Dakota Highway 79 and south of Elk Vale Road. Currently, Dakota Craft Factory is located on the property. The applicant is proposing to extend the public water main from Elk Vale Road south along Old Folsom Road public right-of-way to the property. The property is currently zoned Heavy Industrial District.

South Dakota Codified Law 11-6-19 states that “whenever any such municipal council shall have adopted the comprehensive plan of the municipality or any part thereof, then and thenceforth, no street, park, or other public way, ground, place, space, no public building or structure, no public utility, whether publicly or privately owned, if covered by the comprehensive plan or any adopted part thereof, shall be constructed or authorized in the municipality or within its subdivision jurisdiction as defined in § 11- 6-26, until and unless the location and extent thereof shall have been submitted to and approved by the Planning Commission”. The proposed water main extension is being constructed in the public right-of-way and the property is identified as being located within the area covered by the Rapid City Comprehensive Plan requiring that the improvements be reviewed and approved by the Rapid City Planning Commission.

STAFF REVIEW:

Staff has reviewed the SDCL 11-6-19 and has noted the following considerations:

Old Folsom Road: Staff is recommending that prior to Planning Commission approval, the applicant demonstrate ownership of Old Folsom Road. In addition, a Permit to Work in the Right-of-way must be obtained as needed.

Oversize Costs: The construction plans show a 12 inch water main being constructed to serve property owned by Dakota Craft Business Properties. Staff is recommending that prior to Planning Commission approval, the applicant obtain an agreement from the City of Rapid City for any oversize costs that may be requested.

Permits: The applicant should be aware that an Air Quality Permit must be obtained from the City prior to any surface disturbance of one or more acres. An Erosion and Sediment Control Permit in compliance with the adopted Storm Water Quality Manual must also be obtained. A Permit to work in the Railroad Right-of-Way must also be obtained as needed.

Staff is recommending that the SDCL 11-6-19 Review be approved.
