**RE: 11-6-19 SDCL Review
Sanitary Sewer Construction
Lowry Lane to Elk Vale Road
Section 28, T2N, R8E, BHM
Rapid City, SD**

Dear Vicki:

Transmitted herewith is the Application for Development Review 11-6-19 Review along with four (4) sets of plans for construction of a new 8" PVC sewer line from the City's existing manhole at Lowry Lane and Beale Street to a point just west of the Elk Vale Road for your review and approval. I have reviewed these plans and routing with Gary Engel, SDDOT Area Engineer since the sewer is located in SDDOT right-of-way. Gary has verbally approved the routing but we will have to get a utility permit.

This sewer will be constructed to allow construction of a new hotel planned for Lot B of Lot 1 of Lot D of K-W Subdivision. As designed, the sewer will also serve Lot A of Lot 1 of Lot D of K-W Subdivision, Lot 2 of Lot D, the lots located between Edwards Street and the I-90 right-of-way adjacent to the sewer.

In the future, a new sewer could be connected to MH #1 and extended south along the lot line to serve Tracts B and C.

The areas discussed above will be the extent of the service area for this new line. Topography of the area is not conducive to further extension of this line.

It is anticipated that the Owner will request the City Engineering staff to place for Council consideration a resolution that the City to impose a no tap on the line until such time as a resolution to establish a construction fee be set.

If you have any questions, or desire any additional information, please call us.

Sincerely,

FMG Inc.,

Allen D. Foster, P.E.
