- SITE NOTES:**
- The Contractor is specifically confirmed that the location and/or elevation of existing utilities as shown on these plans is based on records of the respective utility companies and where possible, measurements taken in the field. The information is not to be relied on as being exact or complete. The Contractor must use the appropriate utility company to verify exact location of utilities. It shall be the responsibility of the Contractor to relocate or protect existing utilities which conflict with the proposed improvements shown on plans.
 - North defined from bearing of record for the _____ line or _____ as per _____ dated _____ 20____.
 - Contractor shall verify elevation of temporary benchmarks based on the elevation of the primary benchmarks prior to the start of construction. Consider and notify engineer if elevations differ from those shown on these plans.
(Date source of primary benchmark)
Primary Benchmark - (Describe benchmark)
 - The site is designated as Zone _____ as per Federal Emergency Management Agency National Flood Insurance Rate Study Community Profile No. _____ dated _____ 20____.
 - All trenches under paved areas shall be backfilled with premium material and compacted to meet compaction requirements for the paving job. Concrete material shall be placed and compacted to a least equal to the trench depth at the time of the utility installation.
 - All unexcavated areas are to receive an inches of loam. Contractor to assist such families and residents to install outside of paved areas that were disturbed during construction with an appropriate stand of grass or residential. Contractor shall be responsible for such activities through maintenance of water permit and stabilization.
 - Contractor to install drainage, electric, gas and sewer connections to meet underground utilities located on the site and adjacent to this site prior to being any excavation.
 - Contractor shall refer to architectural plans for exact locations and dimensions of windows, wall openings, single, back doors, screen building openings, steel building utility entrance locations, and exact number and location of doorways.
 - The contractor is responsible for keeping storm water run-off and sedimentation under control during construction.
 - All survey requirements detailed during construction shall be retained by a surveyor licensed in the State, in which the project is located, of the contractor expense.
 - The plans for this project shall meet or exceed the "2nd-Model Standard Signage Specifications".
 - Sign to Lighting Contractor: All floodlights mounted on parking lot light poles for purposes of illuminating the face of the building, as well as any parking lot light poles utilized for lighting the truckload areas, shall be separately controlled for the purpose of security lighting.
 - Parking Ratio - 850 spaces = 4.9/1000 sq. ft. Based on 150,854 S.F. Parking required 27 spaces for the detailed and 180 Associate Parking Spaces.
 - The Contractor shall verify utility and/or permit as necessary inspections and/or conditions required by states and/or utility companies prior to the construction building possession date and the final connection of utility services. All fees shall be paid by the Contractor.
 - All new piping for lighting poles and fixtures with hangers and joints will be provided by Wal-Mart and installed by the electrical contractor. The electrical contractor shall provide Wal-Mart a one-year warranty certificate. All lighting areas for security, safety, visibility, and emergency alarm shall be included in the installation and material price. Refer to architectural plans for the lighting control wiring.
 - Area signs shall begin with number one (1) at the west side and increase numerically to twelve (12) at the east side.
 - All associate parking shall be striped with white paint, and include to be painted yellow 100 associate spaces provided. See plans for location.
 - All dimensions and notes are to the face of curb, unless otherwise shown.
 - Contractor shall be responsible for all removal of and/or relocation, including but not limited to utilities, storm drainage, electric, traffic signals and signs, etc. or repairs that work shall be done in accordance with governing authority specifications and shall be approved by such. All costs shall be included in base bid.
 - The height of the light poles concrete base is striped (see detail).
 - All line striping, stop bars and arrows installed at entrance streets shall be thermoplastic.

PARKING RATIO

WAL-MART PARKING 856 SPACES = 4.9/1000 SQ FT
 ACCESSIBLE PARKING 27 SPACES
 ASSOCIATE PARKING 186 SPACES
 CART CORNERS 18
